ACKNOWLEDGEMENTS

I am profoundly indebted to Dr. R. C. Tomar, Head of Department of Mathematics, M.M.H. College Ghaziabad for his valuable guidance, painstaking supervision and constant affectionate encouragement during the period of investigation. Without his meticulous scrutiny, it would just have been impossible for me to bring this thesis in the present form.

I am also highly thankful to Dr. M. P. Singh, Principal, M.M.H College, Ghaziabad for providing me help in various ways from time to time to carry my research work.

I would like to pay my sincere gratitude to my parents Smt. Shakuntla Devi and Dr. R.R Azad Principal J.V.Jain P.G College Saharanpur as the first gurus of my life and whose efforts, inspirations and blessings put me on this level.

In the same sequence I feel lucky enough to be guided, supported, encouraged and blessed by my respected Bhabhi and Bhaiya Prof. Dr. Gunjan Agarwal and Prof. Kumud Vivek and who are just like my parents.

Lastly, I express my gratitude to my Husband Mr. Ashok Pandey who have to subsist on less than their rightful share of my attention during the period of my research work.

(Pooja Shakun)
