Basavrajappa S.H., N. S. Raju, S. P. Hosmani, S. R. Niranjana (2010). Algal diversity and physico-chemical parameters in Hadhinaru lake, Mysore, Karnataka State, India.

Devi M.J. (1985). Ecological study o

Biswajeet Pradhan and Saied Pirastech (2011). Hydrochemical analysis of the
ground water of the Basaltic Catchements: upper Bhatasi Region,

revision, ISS 10500.

Res.11:200-240.

Carriack J.H. and Schelske L.C. (1997). Have we overlooked the important of
small phytoplankton in productive waters ?. Limnology and
Oceanography 42: 1612-1613.

Chandan Bhora (1990). Limnological survey of an ancient pond at Barharwac

Chandrahas, D. Vernekar (2001). A study on physico-chemical parameters of
Tungbhadra river at Koodle. Eco. Env. & cons. 7(3):331-335.

urbanization on Bellandur lake, Bangalore- A case study. J. environmental,
Chari M. S. (1980). Environmental variation in the physicochemical characteristics of a fresh water pond (M. Phil Thesis), Aligarh Muslim university, Aligarh.

Ferrera Vagaggini (2002). Zooplankton abundance and diversity in lake Bracciano latium, Italy.

Dharmabad, Dist.Nanded,Maha. *Archives of applied Reserch, 3(2):606-609.*

ICMR (1975). Manure of standerds of quality for drinking water supplies, Special report series 44,2nd Ed.

*I. J. E. P. 16(8):561-566.*

Laluraj C.M , P. Padma , C.H Sujatha, S.M.Nair, N.C.Kumar and Chacko (2002). Base line studies on the chemical constitutes of Kayamkulam Estuary
near to the newly commissioned NTPC power station. *India. J. Envti Prtch. 22 (7):721-731.

Singhal R.N., Swaranieet andDavis (1986). The physicochemical environment and the plankton of Managed ponds in Harayana, India. *Acad.Sci.(B),95:253-263*
