List of Tables

Table-1  Seasonal variation in average Temperature, Relative humidity and Rain fall in Bidar for three consecutive years (2008, 2009 and 2010)

Table-2  Measurements of the young mound nests of *Odontotermes wallonensis*

Table-3  Measurements of the established mound nests of *Odontotermes wallonensis*

Table-4  The characteristics of fungus comb with co-efficient values.

Table-5  Comparative account of various fungus combs with respect to different castes of *O. wallonensis* (Wasman)

Table-6  Total population and percentage of different castes of the *O.wallonensis* (Wasman) during the period from January 2008 - December 2009

Table-7  percentage distribution of various castes *O. wallonensis* (Wasman) of in different parts of the mound nests

Table-8  Measurement of the foraging galleries of *O. wallonensis*.

Table- 9:  Foraging Population of *O. wallonensis* from the covered runways on the Eucalyptus trees.

Table-10  Temperature and humidity during foraging activity of *O. wallonensis* in covered runways and foraging galleries.

Table-11  Damages caused to Indoor articles other than the wood-works, by *O. wallonensis* in Bidar area.

Table-12  Damages caused to indoor wood-works by *O. wallonensis* in and around Bidar area.

Table-13  Pattern of damages caused by *O. wallonensis* to various species of trees in and around Bidar area during December2008 to January 2010.

Table-14  Seasonal damages caused by *O. wallonensis* on different species of plants in and around the Bidar during December 2008 to January 2010
