LIST OF TABLES

CHAPTER I

Table 1.1: Flow chart showing the types of ‘Magmatic’ PGE deposits

Table 1.2: Consumption of individual PGMs (.000 Oz) for various applications during 2006-07 (adopted from Johnson Matthey 2008)

Table 1.3: World mine Production, Reserves and Reserve base of PGMs (2007-08)

Table 1.4: Lithostratigraphic sequence in the Western Dharwar craton (Devaraju et al. 2009)

CHAPTER II

Table 2.1: Lithostratigraphic sequence south of Channagiri area (after Devaraju 2000)

Table 2.2: Modal analyses of magnetites and mafic-ultramafic rocks (a) and meta-sediments (b) of Hegdale Gudda Formation

Table 2.3: Chemical analyses of V-Ti magnetites of Hegdale Gudda Formation

Table 2.4: Chemical analyses of metagabbro-ultramafites (a), phyllites (b), metabasites (c), quartzo-feldspathic wackes (d) and carbonates (e) of HGF

Table 2.5: (a) Pd, Pt, Au, Cr, Ni and Cu analyses and PGE: base metal ratios of lithounits of Channagiri mafic-ultramafic complex and HGF, (b) PGE, Au and Re analyses of magnetites of HGF

CHAPTER III

Table 3.1: Modal analyses of ultramafites, magnetites, gabbro and anorthosites of HS.

Table 3.2: Chemical analyses of fine-grained chromite bearing ultramafite of HS

Table 3.3: Chemical analyses of coarse grained ultramafite of Hanumalapur segment

Table 3.4: Chemical analyses of PGE mineralized Cr-magnetite (A) and Ti-magnetite (B) of Hanumalapur Segment

Table 3.5: Chemical analyses of amphibolites (A) and meta-anorthosites (B) from HS

Table 3.6: ICPMS analyses of selected trace and REE elements analyses of ultramafites of PGE mineralized zone of HS.

Table 3.7: Full PGE, Au and Re analyses and ratios of PGE and basemetals HS

Table 3.8: Partial PGE, Au and basemetal analyses of various lithounits of HS

Table 3.9: Comparison of Cu, Ni, PGE and Au concentrations in selected samples from PGE mineralized portions of Hanumalapur segment with Merensky Reef, SJ Reef, UG2, Mantle and CI Chondrite
CHAPTER IV

Table 4.1: Drill hole header details of Hanumalpur segment

Table 4.2: Summarized lithologs of the BH-01 (a); BH-03 (b); (BH-04 (c); BH-05 (d); BH-06 (e); BH-07 (f) and BH-08 (g)

Table 4.3: Average chemical composition of the main lithounits of Hanumalapur segment

Table 4.4: Comparison of major and selected trace elements of the different PGE (Pt+Pd+Au > 1ppm) mineralized groups

CHAPTER V

Table 5.1: Characteristic features of the various types of the PGE mineralized zone in the Hanumalapur segment (after Kaukonen, 2000)
