List of Figures –

1.1 Fig. shows the main units of the effluent of automobile industries.
1.2 Fig. exhibits the link and crossover between biotechnology and environmental biotechnology.
2.1 Fig. shows the location and the area of the Aurangabad city.
2.2 Fig. map showing the location of the Waluj MIDC area in Aurangabad of Maharashtra.
3.1 Fig. showing the results of before and after chemical treatment.
4.1 Fig. shows the engineering isometric view of the novel bioreactor
4.2 Fig. shows the schematic view of the novel bioreactor.
4.3 Fig. shows the engineering isometric view of the conventional bioreactor
4.4 Fig. shows the schematic view of the conventional bioreactor.
4.5 Fig. (A & B), shows the surface aerator of both bioreactors.
4.6 Fig. shows the pilot plant of the novel bioreactor.
4.7 Fig. shows the pilot plant of the conventional bioreactor
5.1 Fig. shows the mix bacterial culture on nutrient agar.
5.2 Fig. shows the mix bacterial culture on nutrient agar.
5.3 Fig. shows the growth of the *Aspergillus niger* species.
5.4 Fig. (I & II), shows the *Scenedesmus* species.
5.5 Fig. shows the *Ankistrodesmus* species.
5.6 Fig. shows the *Paramecium* species.
5.7 Fig. shows the *Arthrodesmus* species.
5.8 Fig. shows the *Navicula* species.
5.9 Fig. shows growth of the *P. aeruginosa*.
5.10 Fig. shows the powder formulation of *P. aeruginosa*.
5.11 Fig. shows the colonies of the *P. aeruginosa* on the king ‘B’ media.
5.12 Fig. exhibited the graphic microbial count report in powder formulation.
5.13 Fig. shows growth of the *P. aeruginosa*.
5.14 Fig. shows the fresh immobilization beads of *P. aeruginosa*.
5.15 Fig. shows the dried immobilization beads of *P. aeruginosa*.
5.16 Fig. shows the colonies of the *P. aeruginosa* on the king ‘B’ media.
5.17 Fig. exhibited the graphic microbial count report in immobilization.
6.1 Fig. shows the dosing adjustment for chemical treatment.
6.2 Fig. shows the result of before and after chemical treatment.
