ACKNOWLEDGEMENT

The author expresses her sincere gratitude to Dr. C. Damodaran, M. Ph.D., D.E.L., Head: Biology and Research Division, Forensic Sciences Department, whose valuable guidance and constant inspiration have made possible for the present project to assume its final shape. The author considers it a privilege to associate herself with him.

Sincere thanks are due to Mr. G. Kumaravelu, I.F.S., (Botanist: I Forest Service) for the identification of Cleistanthus collinus plant material. The author records her grateful acknowledgement to Drs. T.R. Govindachari (Amrutanjan), N. Viswanathan (Ciba-Geigy) and G. Srimannarayana (Osmania University) for kind gifts of authentic samples of the lignan lactones of C. collinus.

The author wishes to express her gratitude to Dr. R. Kumaraswamy for gift samples of β-glucuronidase and arylsulfatase; Prof. P. Nataraja, Dr. S. Ilangoval and Dr. P. Periakali (University of Madras) for providing spectrofluorometric facility; Dr. (Mrs) V.C. Anguli for sincere discussion regarding histopathology; Prof. K. Marimuthu (University of Madras) for providing facility to take photomicrographs. The spontaneous assistance from the fellow research scholars Mr. B. Naziruddin, Mr. A. Selvakumar, Mr. B.K. Mohanraj and Mr. V. Shankar is thankfully acknowledged.

The author wholeheartedly acknowledges the excellent cooperation rendered by the staff of the Biology and Research Division, Photography Unit and Animal House of Forensic Sciences Department. The service rendered by other members of this institution in one way or another is also gratefully acknowledged.

Deep indebtedness is felt towards the financial assistance extended by the Bureau of Police Research and Development, New Delhi during the tenure of this project.
