ACKNOWLEDGEMENTS

First and foremost I would like to thank my supervisor Prof. Sheila Mishra for her guidance, support and contribution for my research. I also convey my heartily thanks to my co-supervisor Prof. R.K. Mohanty who also rendered his immense help whenever I needed and literally forced me to do the present research.

My academic career in early days was in fact shaped by many scholars without whom probably it would not have been possible for me to reach the present position in my academic life. Of these mention may be made of Prof. V.N. Misra, Prof. S.N. Rajaguru, Prof. K. Paddayya and Prof. M.L.K. Murty

Besides, I am also thankful to my old friends and well wishers from whom I have learnt immensely Late Dr. Shiva Nanda, Prof. R.K. Ganjoo, Prof. U.S. Moorti and Prof. Ravi Korisettar. I also thank Prof. V.S. Shinde, Prof. S. Deo and Prof P.P. Joglekar and all my friends from Deccan College for their encouragement.

I owe my thanks to all the teaching and non teaching staffs as well as the library staffs of Deccan College for their unpretentious help and cooperation at different stages.

In course of my academic pursuit, I have got immense support from my colleagues in Archaeological Survey of India. I thank them all. Photographs and drawings used in this thesis are from Archaeological Survey of India which is duly acknowledged.

My special thanks to Ms. Deepti Mishra, for typing certain part of my thesis and also to Dr. Sikhasree Ray for extending help during writing of my thesis.

It is very difficult to acknowledge all individually and would be awful if I forget to mention someone. So I thank everyone who has helped me directly and indirectly in completion of my thesis.

Last but not the least, it would not have been possible without the inspiration and support of my wife Dr. Minarva Sonowal who always stood with me in every stage of my life and took the complete responsibility of home and made me free to devote to the research.

S.B. Ota
