</table>
1.13 Land-use profile of district Kinnaur: 1960-61 to 2002-03.

1.14 Household category-wise total number of operational holdings and area during 1985-86.

1.15 Average size of holding in District Kinnaur: 1970-71 to 2000-01.

1.16 Cropping Profile of district Kinnaur since 1957-58 to 2002-03.

1.17 Infrastructural profile in Kinnaur in 1990-91 and 2010-11.

2.1 Percentage of families living Below Poverty Line during 1977-78 to 1987-88.

2.3 Sector-wise synoptic view of Tribal Sub-Plan outlay since 1974-78 to 1974-90.

4.1 Tehsils of Tribal Belt arranged in terms of Composite Development Index.

4.2 Village-wise distribution of Sampled Households.

4.3 Procedure for computation of Gross Farm Income from Agricultural Sector vis-à-vis Variable Costs of Sampled Villages.

4.4 Procedure for computation of Gross Farm Income from Horticultural Sector vis-à-vis Variable Costs in Sampled Villages.

4.5 Procedure for computation of Gross Income from Animal Husbandry Sector vis-à-vis Variable Costs of Sampled Villages.
4.6 Procedure for computation of Gross
Income from Forest Sector
vis-à-vis Variable Costs in Sampled Villages. 154

5.1 Household-wise/category-wise number of
operational holdings in the sampled villages. 183

5.2 Demography vis-à-vis average size of the
family in the sampled villages. 184

5.3 Adult Equivalent Units/Consumer Units in
the sampled villages. 187

5.4 Literacy Rates in the sampled villages. 189

5.5 Levels of Living (in terms of living space and
consumer durables) in the sampled villages. 191

5.6 Asset structure of the sampled villages. 193

5.7 Land-holding pattern vis-à-vis tenurial
change in Kinnaur. 196

5.8 Average size of operational holding in
the sampled villages. 198

5.9 Comparative statement on average size of
operational holding and cultivable holding:
village-wise and category-wise. 199

5.10 Area under fruits and vegetables in
ITDP Kinnaur since 1970-71 to 1990-91. 202

5.11 Extent of area under horticulture and
non-food crops in the sampled villages. 203

5.12 Cropping intensity vis-à-vis irrigation intensity
in District Kinnaur since 1970-71 to 1990-91. 206
5.13 Extent of improved inputs to total input cost
  village-wise and household category wise. 207
5.14 Extent of hired labour days (in percent) to
  total labour days. 209
5.15 Extent of marketable surplus in sampled villages. 211
5.16 Range of percentage variation (marketable surplus)
  among sampled villages. 212
5.17 Extent of monetization in the sampled villages. 214
5.18 Productivity (per hectare) of major crops
  grown in the sampled villages. 216
5.19 Employment profile (based on family labour days)
  in the sampled villages. 219
5.20 Source-wise total income in the sampled villages. 222
5.21 Category-wise distribution of total income into
  farm income and non-farm income
  in the sampled villages. 224
5.22 Household-wise percentage consumption
  expenditure in the sampled villages. 226
5.23 Household-wise per Capita Farm Income and
  Non-farm Income in the sampled villages. 228
5.24 Village-wise percentage distribution of
  number of operational holdings vis-à-vis
  their share in the productive assets. 231
5.25 Location-wise comparative statement of
  assets and income in the sampled villages. 234
5.26 Location-wise distribution of holdings and
  ‘land’ in the sampled villages. 237
5.27 Location-wise distribution of holdings and ‘livestock’ in the sampled villages. 238

5.28 Location-wise distribution of holdings and ‘agricultural wherewithal’ in the sampled villages. 239

5.29 Location-wise distribution of holdings and ‘farm income’ in the sampled villages. 241

5.30 Location-wise distribution of holdings and ‘total income’ in the sampled villages. 243

5.31 Gini’s co-efficient for productive assets in the sampled villages. 244

5.32 Gini’s co-efficient on farm income and total income in the sampled villages. 245

5.33 Applying Analysis of Variance (ANOVA) test to the percentage area under orchards in the sampled villages. 247

5.34 Setting up table for F-value vis-à-vis area under orchards. 249

5.35 Application of ‘ANOVA’ test to percentage hired days employed in the sampled villages. 250

5.36 Setting up table of ANOVA and calculation of F-value on hired days. 250

5.37 Applying ‘ANOVA’ test to the extent of improved inputs in the sampled villages. 251

5.38 Setting up table for calculation of F-value on improved inputs. 252

5.39 Identifying extent of change in the sampled villages. 253
