ACKNOWLEDGEMENT

What a relief to have finished the project in the time set for it! As I sit in a reminiscent mood, I think of all those who stood by me, helping in the pursuit these three long years. Images flash past one by one and I bow to them thankful and indebted.

Formost among the benefactors stands my Research Supervisor, Dr. H.S. Banyal, Reader in Protozoology, Department of Zoology, Panjab University, Chandigarh. But for his constant encouragement, painstaking self-denying interest and supreme guidance, this seeming uphill venture would have stayed unaccomplished. The present work is a humble monument to the love and devotion of a teacher and his taught.

I like to place on record my gratitude to Dr. K.K. Tandon, former Chairman and Dr. O.P. Mittal, present Chairman, Department of Zoology for providing me with the necessary laboratory facilities.

The ungrudging help Dr.G.C. Mishra, Dr. Grish Varshney and Mr. Arvinder of the Institute of Microbial Technology (IMTECH), Chandigarh extended to me, went a long way in the success of the present enterprise.

I am obliged to my colleagues Miss Upma, Miss Seema and Mrs. Harpreet for their ever willing help during the tenure of my present study. My thanks are also due to Mr. V.P. Sharma and Mr. Ravi Dalmotra for the technical help received.

Last but not least, I thank my "uncle", Mr. K.K. Malhotra (Retd. Principal, H.P.U. Evening College, Shimla), friends and the members of my family for boosting up my morale whenever it went low.

(SANJAY KUMAR)
