ACKNOWLEDGEMENTS

First and foremost, praises and thanks to the God, the Almighty, for His showers of blessings throughout my research and gave me everything: Patience, health, wisdom, and blessing to complete the research work successfully.

At this moment of accomplishment, first of all I pay homage to my guide, Dr. Jagbir Singh, Professor and Head, for his judicious and precious guidance, critical appreciation, creative ideas and constant encouragement throughout the course of this work. This work would not have been possible without his guidance, support and encouragement. Under his guidance I successfully overcame many difficulties and learned a lot.

I am extremely indebted to whole teaching staff of Department of Zoology and Environmental Sciences, Punjabi university, Patiala. I owe gratitude to non teaching staff of our department for providing necessary infrastructure and resources to accomplish my research work.

It’s my fortune to gratefully acknowledge the support of some special individuals. Words fail me to express my appreciation to my best friends Harkanwal Singh and Jasneet Kaur for their support and generous care. They were always beside me during the happy and hard moments to motivate me. I can see the good shape of my thesis because of their help and
suggestions in formatting the entire thesis. They were always there when I really needed. Thank you doesn't seem sufficient but it is said with appreciation and respect to both of them for their support, encouragement, care, understanding and precious friendship.

I take this opportunity to sincerely acknowledge the Department of Science and Technology (DST) Government of India, New Delhi and Punjab State Council of Science and Technology (PSCST), Chandigarh, for providing financial assistance in the form of Junior and Senior Research Fellowship which buttressed me to perform my work comfortably.

I take this opportunity to sincerely acknowledge Dr. B.N. Nagpal, Scientist E. (National Institute of Malaria Research) NIMR, New Delhi for his meticulous assistance, valuable help and support.

I would like to thank Mr. Rakesh Kumar, Radical Scientific Equipment, Ambala Cantt. for photography of mosquito specimens. I owe a great deal of appreciation and gratitude to Miss Narinder Kaur, IIT Ropar for her constant support in Scanning Electron Microscopic work. I expand my thanks to Dr. Jagpreet Singh Sodhi for his constant support.
I implore my profound gratitude and give a heartfelt, special thanks to Eminent Scientist Major Singh Dhillon (USA) for providing me great opportunity to attend 6th International Congress in La Quinta (Palm Springs), California, USA, organized by Society for Vector Ecology (SOVE). I would also like to thank his wife for her love, care and support.

I would also like to extend huge, warm thanks to my friends Hardeep Kaur Sandhu, Akrittee Jethi, Shobhna Thakur, Anvrita, Raman, Baljeet Kaur Gill, Abhinav Saxena and Vikram Rathor.

I greatly acknowledge the generous help of my lab mates.

Words are short to express my deep sense of gratitude towards my mother, brothers and bhabhi ji for their sincere encouragement and inspiration throughout my research work and lifting me uphill this phase of life. I owe everything to them. Of course no acknowledgments would be complete without giving thanks to my sweet sweet nephew Jatish Goyal.

Last but not least, my special acknowledgements go to some special person who will always with me till the end of my life. In conclusion, I recognize that several people have knowingly and unknowingly, negatively and positively helped me. I am thankful to them also.
To err is human. In the process of acknowledging, I might have missed some names. I sincerely acknowledge to those whose names might have missed unintentionally for their contribution in making this work a success.

Thanking all of you once again.

(Shipali Rani)
