Acknowledgements

.........As the journey of my life takes a new turn, I look back at the last turn and I am overwhelm with different sweet memories of the days of my PhD at NCCS. I am very happy to submit my thesis that has resulted from over five years of work. What looked like a very difficult task initially ultimately turned out to be a very rewarding journey made easier and memorable with help from many people. Today, at the end of my journey of Ph.D, I want to acknowledge those without whom; it would not have been possible for me to reach my destination.

First of all, I am deeply grateful to my research supervisor, Dr. Vasudevan Seshadri, for his guidance, solid support and also for creating and maintaining a relaxed, enjoyable, familial atmosphere and teaching me how to work as a team as well as an independent researcher. Sir, you have great potential to handle students and situations without a single complaint. I was learning and observing you for last five years that you have got an exceptional scientific skill, talent and growing interest in science that make you a successful mentor.

It is my pleasure to express my profound gratitude to Padmashree Dr. G.C. Mishra, Director NCCS, for allowing me to carry out my doctoral research at NCCS with excellent infrastructure and facility.

Would like to duly acknowledge Dr. Ramanmurthy and Dr. Rahul Bankar, Experimental Animal Facility, NCCS, for being perpetually helpful in carrying out my extensive animal experiments. My heart felt thank to Abdul Shaikh, Vaishali, Inamdar, Santosh, Shelke, Thorat and all the staff in animal house.

The reconcilement will be out of tune if I do not acknowledge all the core facilities of NCCS including Sequencing facility (Girish), Media section (Anjli, Medha, Pawer), Maintenance section (Mr. Sindagi) for regular instrument maintenance to allow the work to go uninterrupted, washing room, computer section (Mr. Dharmendra, Ms. Kirti and Mr. Solanki), library (Nimaji), Electrical substation (Mr. Puri), Academic cell, Administration and repository for providing access and facilities to smoothly sailing of
the work. My special thanks to Gulab and Tukaram for the delicious food served in hostel and canteen respectively.

My honorable rapprochement to Dr. J. Joseph for providing the Ago2 siRNA as well as his invigorating and attentive discussion in the work presentations. I am very greatful to our journal club members Sayeed, Prayag, Mukesh, Pankhuri, Manas, Deepak, Aditi and Swati for their constructive arguments and valuable suggestions.

I wish to express my sincere thank to Dr. Wani and Dr. Kundu for allowing me using their instruments and maintaining a very pleasant environment to work in the lab. I am very thankful to Dr. Shiras for her suggestions for finding a post doc and finally giving a strong recommendation.

I hereby confess my soul gratitude to all the members of lab#1 Geetanjali, Navita, Rupesh, Amrita, Sathish, Anuradha, Rjinderj, Priyanka, Santhosh, Madhavi, Vinit, Reeti, Supinder, Gayatree, Kanupriya, Vikrantn and Rosalin who were always there to cheer me and keep the lab atmosphere spirited.

Language fail to communicate my gratitude to Prabhat, Mansoor, Ranveer, Muzamil, Sachin S, Vishal, Shohrab, Pratima, Mithila, Apu, Manasi, Phalguni, Suchismita, Snehal, Mrutyunjay, Sangeeta, Sunil, Sachin, Uma and Kiran who were always there to support me and made my stay in NCCS, a memorable one; I thank all of them for all the support and specially being with me at all situations. I have no words when it comes to thank my special friend Navjot for her company, support and for always being there whenever I needed. I feel myself expressionless and word deficit to overstate my loving greatfulness to my roommate Pabitra. Thank you pabitra for your earnest assistance, empathy and comfort offered in the room and for being with me during hard times. I deeply indebted to Subhsri for her technical assistance in isolating the embryonic pancreas, and for being with me at hard times and finally for creating a familial & lively atmosphere in the room.

I express my deepest appreciation to my seniors Mr. Baskar B and Mrs. Bhavana M for their continuous help and encouragement during initial stages of my work.
Especially I thank them to teach me how to work in a group and finally helping me in various aspects scientifically and morally. I would like to thank the graduate trainees Itishri, Ankita and Richa for their help in different projects.

Words fail to express my sincere gratitude to my wonderful lab mates Navjot, Shardul, Arya, Poonam, Abdul and Prachi for creating a pleasant work environment and their support in many scientific and non-scientific issues. I heartily thank them for their humorous jokes to make the hectic lab environment very cool to work and making me feel at home during my stay in the lab. Without their encouragement and understanding it would not have been possible to submit my thesis. It is really tough to explain the help of Shardul in almost everything from suggesting valuable experiments, performing the experiments and finally correcting the thesis. Words are quite inadequate to pay my sense of credit to Mrs. Arti for providing all the reagents for the work and more than that creating a healthy atmosphere in the lab.

I would like to duly acknowledge the support of Department of Biotechnology (DBT) for their financial help for the project and financial assistance from CSIR in the form of fellowship for carrying out my research and my academic affiliation to Pune University for Ph.D. I thank Mrs. Takalkar madam and Mr. Pawaskar for their assistance in clearing the official formalities associated with this degree.

I am falling short of words when it comes to thank the affection and blessings of my parents. This thesis is dedicated to my family in gratitude for their unconditional love and support to pursue and complete my Ph.D. They deserve far more credit than I can ever give them.

Finally, I would like to thank all whose direct and indirect support helped me completing my PhD work. I learned a lot during this time and I am convinced that this knowledge will help me in future.............

Thanks Again.............

Amaresh C Panda.
