Acknowledgements

“O Lord, who lends me life, lend me a heart replete with thankfulness.” ~ William Shakespeare. With this I make a most humble effort to thank all who made this work possible.

Dr. Padma Shastry, my mentor, whose constant endeavor towards perfection and most profound scientific know-how was greatly instrumental in designing and execution of this project. Ma’am thank you for your help, support, guidance, criticism and appreciation that was vital to whatever I have achieved today and will achieve in future.

I thank Padmashree Dr. G. C. Mishra, Director NCCS, for providing the infrastructure without which this work would not have been possible. I am highly indebted to Dr. B. M. Swamy and Dr. Shashikala Inamdar, Dept. of biochemistry, Karnataka University, Dharwad, for providing a constant supply of lectins required for this work. Thank you Sir and Madam, for your scientific inputs, valuable suggestions and a constant interest in my work and also for providing an insight into the field of Glycobiology. I would take this opportunity to thank Satish, Vishwanath, Nagaraj and Sachin who over a period of time have ensured the steady and prompt supply of purified lectin, without their help this project would not have been completed in time. Thank you all for your help and support.

I wish to extend my gratitude to Dr. Prakash Deshpande for providing many reagents and blood samples that were crucial for this work. Thank you Sir for your timely help. I would also like to thank Dr. Sandhya Sitawad, Dr. Parab and Dr. Shailza Singh for being co-operative and supportive and providing a very cordial atmosphere in the laboratory.

I would like to extend my gratitude to the staff of all the central facilities at NCCS. Mr. Basutkar and his team for providing washed, autoclaved and ready-to-use glasswares that have contributed volumes in lessening the work load. The media section and cell repository for providing cell lines and media whenever requested for. Hemangini, Swapnil, Pratibha, Amit, Roopali and Ashwinin -the FACS facility, who have made a great contribution in generating vital data for this thesis. I thank Mrs. Ashwini Atre and Nitin for acquiring all my confocal images without which a lot of data could not have been generated. Work in lab would have suffered without the timely help
of the staff from instrumentation and maintenance, electric sub station and AC plant. I would like to express my thanks to the staff of Academic cell who have been most efficient in maintaining records and other official procedures during the course of my PhD. I am grateful to the Stores and Purchase department for ordering and supplying of chemicals and reagents. The Accounts section for taking care of fellowships and contingencies and the Administration section for the smooth progress of my PhD tenure. I thank Mr. Nema and Mrs. Panse for the library facility. I thank the staff of Computer section for their help in matters related to internet and other technicalities. My thanks is also due to Sandra and Smitha, for their kind cooperation and help in official procedures. I also thank Dr. Y. Shouche, Dr. V. Sheshadri and Dr. N. Lenka for the hostel facilities. Work at NCCS would not have been possible without the lab boys and the security staff from Great Wall and Suvarna housekeeping agencies.

A major part of my work was dependent on the supply of blood samples for which I thank Hemangini, Swapnil, Sonia and Satish for their help in drawing blood. Acknowledgements are due to all the donors who have contributed by sparing their blood. I know that “thank you” is too small a word for that.

I am grateful to Indian Council of Medical Research (ICMR) for providing fellowship for my PhD tenure. I thank Department of Biotechnology, Pune University for registration facilities. I also thank Dr. J. K. Pal for his helpful comments during interviews that helped in improving my thesis.

“Life is partly what we make it, and partly what it is made by the friends we choose.” I am lucky to have been blessed with friends who have been a constant support and have helped me sail through this journey so far. I thank Mrs. Jayshree Jagtap for being my first instructor and introducing me to the world of animal tissue culture. I thank my seniors Dr. Vandana Prasad and Dr. Sudheer Kumar for teaching me various techniques and providing valuable advice. My heartfelt thanks to Gowry, my friend since college, for making my stay at NCCS a joyful experience. Cheers to all the best times we spent together. A wonderful friend and companion Vasundhara (Sundi), deserves a special thanks for her pleasingly palatable recipes. Ever loving, caring and helping Sandhya (Sandy), thank you for those encouraging words and being such a wonderful flat mate. Natesh (Natu), my junior, thank you for your help and support. I wish him the very best in life. I thank Mruthyunjaya(MJ), my friend and colleague, for his help and scientific inputs. I thank Chandrika, my junior, for her help in writing this thesis. I would like to thank Sayeed, Santosh, Sandeep and Devalji for their continued support and help. My
sincere thanks to all the juniors - Ganesh, Riccha, Vasanti, Parveen, Rammyani, Partho, Aparajita, Mithila, Prachi, Sarojini, Shilpa, Priyanka and Ashwin.

“A word of encouragement during a failure is worth more than an hour of praise after success”. I thank Chittabrata for being a source of encouragement and support. You made me hold on when I felt like giving up. I wish you success and happiness in life. I thank Aditi, Titli, Prapti, Maitreyee and Neha for their love and support.

“The hand that rocks the cradle may not rule the world, but it certainly makes it a better place” - Margery Hurst. With this I make an attempt to thank the people who mean the world to me – My family. I extend my gratitude to my parents-they bore me, raised me, supported me, taught me and loved me. I thank my brother Jayanto, my sister-in-law Nibedita and my little niece Ananya for their selfless love and support. All I can say is it would take another thesis to express my deep love for you all. Your patience, love and encouragement have upheld me.

Above all I humbly thank God for bestowing his blessings and giving me the opportunity to live my dreams.

Radha Pujari
