Acknowledgements

This thesis is the account of my work in the field of Environmental biotechnology carried out at IGIB, which would not have been possible without the help of many people who have contributed a lot to my work.

A few lines are too short to make a complete account of my deep gratitude for my supervisor, Dr. Rita Kumar, Scientist, IGIB for her continued encouragement and invaluable suggestions during this work. I thank her for her support and the freedom she gave me to pursue my research with ease and confidence. Her dedication to science has inspired me at every step. I am deeply indebted to her for the lessons she gave me on the importance of perseverance, hard work and discipline.

I am also thankful to Prof. S. K. Brahmachari, former Director IGIB and Dr. Rajesh Gokhale, Director IGIB, for kindly providing me the necessary environment for research and allowing me to make full use of the diverse laboratory facilities at the Institute to carry out this work.

I would also like to acknowledge the other faculties at IGIB, Dr. Mitali Mukherji, Dr. Santosh Pasha, Dr. Balram Ghosh, Dr. Beena Pillai, Dr Anurag Agrawal, Dr. Debasis Dash, Dr. Shantanu Chowdhury, Dr. Shantanu Sen Gupta, Dr. Ramachandran, Dr Abhay Sharma, Dr. Shridhar Shivasubbu and Dr. Yogendra Singh for their encouragements during course work and important suggestions during my presentations which have benefited my research work.

I would also like to thank Mohit Swarnakar, Vineet Jha and Anupom Mondal for their practical help in experimentation and analysis. A special thanks goes to Meenakshi Anurag, without her, the analysis would not have taken the final shape.

I am very thankful to my seniors for their valuable suggestions during my Ph.D. My special thanks goes to Dr. Anil Kumar for helping me at each and every stage of my work. His scientific aptitude is really commendable and the stimulating discussions we had were always gratifying.

My experience at IGIB would not have been such a pleasurable one without the presence and companionship of my lab mates. My special thanks goes to Purnima who not only gave me friendly support but also helped me through various phases of work. Thanks to her for being so calm and so supportive. Her courage is admirable and I wish her all happiness. I can not imagine the lab without Saurabh. He has taught me not to let the work pressure come in the
way of your happiness. His funny punch lines will be a pleasant memory throughout. I would like to acknowledge Manash and Suresh for their constant help and encouragement for the computational analysis and otherwise. They have created a positive research environment in the lab and have always inspired me to give my best to it. Rashmi, Mritunjay, Virendra and Abhisek are like little angels who have illuminated my life during the second phase of my PhD. I have learned a lot during healthy discussions with them, not to mention the constant help and support I have gained from them both professionally and emotionally. I would also like to acknowledge past members of the lab Adarsh, Ratan, Yogendra, Sraddha, Jyoti, Shweta and Reena for being there whenever I needed. The acknowledgements will not be complete without the mention of some of the brightest summer trainees. I was lucky to have Virendra, Deepika, Bedoshree, Bikash and Richa. Their interest to learn and actively participate in designing experiments has inspired me a lot. A special thanks goes to Dr. Sapna. Her jolly nature and ‘chemical’ thinking are unforgettable. Thanks to Harpal Sir, Rambir Bhaiya, Sanjeev bhaiya and Barjeel for their timely assistance in the lab. I pray for the success and happiness of my colleagues.
