Chapter 1 Introduction 1-16
  Theoretical framework 2
  Motivation for the present study 4
  Empirical evidence 6
  Major research gaps 7
  Objectives 8
  Hypotheses 9
  Data and methodology 10
  Organisation of the thesis 15

Chapter 2 Review of literature 17-32
  Introduction 17
  Coping with cost of illness: Types and sequences 17
  Coping behaviour and nature of illness 23
  Coping strategies and socio-economic outcomes 26
  Summary 29

Chapter 3 Socio-economic profile and prevalence of morbidity 33-53
  Introduction 33
  Profile of the sampled households 33
  Prevalence of morbidity 43
  Summary 51

Chapter 4 Treatment seeking behaviour of slum dwellers 54-73
  Introduction 54
  Methodology 54
  Empirical findings 55
  Summary 72
Chapter 5  Economic burden of ill-health among the slum dwellers  
Introduction  
Cost of Illness: Perspectives and Approaches  
Economic burden of ill-health  
Catastrophic health expenditure  
Summary  

Chapter 6  Dealing with cost of illness: Choice of strategies  
Introduction  
Selection of households for longitudinal study  
Coping behaviour of the households  
Summary  

Chapter 7  Dealing with cost of illness: Type and sequence of strategies  
Introduction  
Coping behavior and illness characteristics  
Sequence of coping strategies  
Summary  

Chapter 8  Determinants of household coping strategies with illness  
Introduction  
Methodology  
Hypotheses  
Empirical findings  
Summary  

Chapter 9  Economic consequences of illness  
Introduction  
Conceptual framework  
Methodology  
Empirical findings  
Summary  

Chapter 10  Summary and policy suggestions
