ACKNOWLEDGMENT

The drops of words are few, but the ocean of feelings of gratitude is deeper in my heart for those who proved themselves to be the lamppost in the way of accomplishing my research project.

First of all, I am greatly and whole heartedly thankful to the Almighty God, with whose grace and blessings, I have been able to clear another phase of my life.

I feel pleasure to place my sincere thanks to the worthy and honourable guide Mrs. Satpal Grewal for providing encouragement during the course of study. It has been cherished privilege to work under her supervision. I feel short of words to express my inner feelings of indebtedness to my guide, whose valuable guidance, encouraging attitude, constant inspiration, sympathetic attitude and untiring efforts throughout entire course of this investigation enabled me to accomplish this study.

I extend my thanks to the Principals and teachers of all schools, who co-operated with me for the collection of the required data. I am also highly thankful to many authors who remained behind the scene but whose works have been often consulted and referred to in this thesis. I am equally grateful to the members of my family and friends for their selfless prayers.

Last but not the least, I express my sincerest and whole hearted thanks to my mother for her kind understanding, selfless sacrifice and patience.
