## CONTENTS

### INTRODUCTION 1

### OBJECTIVES OF THE PRESENT STUDY 9

### LITERATURE REVIEW 11

- Historical Background of Temporal lobe epilepsy 12
- Epidemiology of Temporal lobe epilepsy 12
- Semiology of Temporal lobe epilepsy 13
- Diagnosis of Temporal lobe epilepsy 14
- Prognosis of Temporal lobe epilepsy 14
- Aetiology of Temporal lobe epilepsy 15
- Anatomy of Temporal lobe epilepsy 15
- Pathophysiology of Temporal lobe epilepsy 16
  - Hippocampal Sclerosis 16
  - Axon Sprouting 19
  - Gliosis 19
  - Mossy Fiber Sprouting and Recurrent Excitation 19
  - Impaired Inhibition 21
- Pilocarpine Model of Temporal Lobe Epilepsy 22
- Glutamate exitotoxicity 24
- Oxidative stress in epilepsy 25
- Role of Neurotransmitters in Temporal lobe epilepsy 26
  - Glutamate 27
    - Ionotropic Glutamate receptors 30
    - NMDA receptor 31
    - AMPA receptor 32
    - Glutamate Transporter 34
    - Glutamate dehydrogenase 35
  - GABA 35
  - Acetylcholine 37
Dopamine 38
Signal transduction through Second Messenger-
Inositol 1,4,5-trisphosphate (IP3) 40
Present anti-epileptic treatment and challenges 42
Herbal Medicine and epilepsy 43
*Withania somnifera* 44
  - Taxonomical Classification 44
  - Plant Description and Distribution 45
  - Constituents 45
  - Pharmacological properties 46

**MATERIALS AND METHODS** 49
Chemicals used and their sources 49
  - Biochemicals 49
  - Radiochemicals 49
  - Molecular Biology Chemicals 49
  - Confocal Dyes 50
Animals 50
Plant material 50
Induction of Epilepsy 51
Determination of Anti-Epileptic Potential of *Withania somnifera* 51
Animal Groups 52
Tissue Preparation 52
Nissl staining 53
TOPRO-3 staining 53
Behavioural studies 53
Radial Maze Test 53
Y-Maze Test 54
Rotarod Test 55
Grid Walk Test 55
Narrow Beam Test 56
Quantification of Glutamate 56
Glutamate dehydrogenase Assay

Glutamate Receptor Binding Studies Using [3H] Radioligands
In The Brain Regions Of Control And Experimental Rats

Protein determination

Analysis of the receptor binding data

Gene Expression Studies In Different Brain Regions Of
Control And Experimental Rats

Preparation of RNA

Isolation of RNA
cDNA Synthesis

Real-Time PCR Assay

Determination of SOD Activity

Determination of Catalase Activity

TBARS Assay

IP3 Content In The Brain Regions Of Control And Experimental Rats

Principle of the assay

Assay Protocol

Phospho-Akt Expression In Hippocampus Of Control
And Experimental Rats

NMDA R1, NMDA 2b And AMPA (Glur2) Receptor Subunit
Expression Studies In The Brain Regions Of Control
And Experimental Rats Using Confocal Microscope

RESULTS

Seizure frequency per 4 hours interval over the 72 hours
video recording period of control and experimental rats

Behavioural Studies

Behavioural response of control and experimental rats in Radial Arm Maze test

Behavioural response of control and experimental rats in Y-Maze test
Behavioural response of control and experimental rats on Rotarod test

Behavioural response of control and experimental rats on grid walk test

Behavioural response of control and experimental rats on narrow beam test

Hippocampus

Study of histopathology in hippocampus of control and experimental rats

Nissl Staining in hippocampal sections of control and experimental rats

TOPRO-3 staining in hippocampus sections of control and experimental rats

Study of antioxidant potential of *Withania somnifera*, *Withanolide-A* and carbamazepine using TBARS assay, SOD assay, CAT assay, SOD gene expression and Gpx gene expression in hippocampus of control and experimental rats

Lipid peroxidation assay in the hippocampus of control and experimental rats

Superoxide dismutase assay in the hippocampus of control and experimental rats

Catalase assay in the hippocampus of control and experimental rats

Real time PCR amplification of SOD mRNA from the hippocampus of control and experimental rats

Real time PCR amplification of Gpx mRNA from the hippocampus of control and experimental rats

Study of glutamate synthesis, transport and metabolism using glutamate content, GDH assay, GLAST expression and GAD expression in hippocampus of control and experimental rats

Glutamate content in the hippocampus of control and experimental rats

Glutamate dehydrogenase assay in hippocampus of control and experimental rats

Real time PCR amplification of GLAST mRNA from the hippocampus of control and experimental rats

Real time PCR amplification of GAD mRNA from the
NMDA and AMPA receptor function in hippocampus of control and experimental rats

Scatchard analysis of NMDA receptor using $[^3]H$ MK-801 binding against MK-801 in the hippocampus of control and experimental rats

Scatchard analysis of AMPA receptor using $[^3]H$AMPA binding against AMPA in the hippocampus of control and experimental rats

Real time PCR amplification of NMDA R1 receptor subunit mRNA from the hippocampus of control and experimental rats

Real time PCR amplification of NMDA 2B receptor subunit mRNA from the hippocampus of control and experimental rats

Real time PCR amplification of GluR2 subunit of AMPA receptor mRNA from the hippocampus of control and experimental rats

NMDA R1 receptor subunit expression in the hippocampus of control and experimental rats using confocal microscope

NMDA 2B receptor subunit expression in the hippocampus of control and experimental rats using confocal microscope

AMPA (GluR2) receptor subunit expression in the hippocampus of control and experimental rats using confocal microscope

IP3 content in hippocampus of control and experimental rats

Real time PCR amplification of Bax mRNA from the hippocampus of control and experimental rats

Real time PCR amplification of Caspase 8 mRNA from the hippocampus of control and experimental rats

Real time PCR amplification of Akt-1 mRNA from the hippocampus of control and experimental rats

Phospho-Akt expression in the hippocampus of control and experimental rats using confocal microscope
**Cerebral Cortex**

Study of antioxidant potential of *Withania somnifera*, Withanolide A and Carbamazepine using TBARS assay, SOD assay, CAT assay, SOD gene expression and Gpx gene expression in cerebral cortex of control and experimental rats

- Lipid peroxidation assay in the cerebral cortex of control and experimental rats
- Superoxide dismutase assay in the cerebral cortex of control and experimental rats
- Catalase assay in cerebral cortex of control and experimental animals
- Real time PCR amplification of SOD mRNA from the cerebral cortex of control and experimental rats
- Real time PCR amplification of GPx mRNA from the cerebral cortex of control and experimental rats

Study of altered Glutamate synthesis, transport and metabolism using Glutamate content, GDH assay, GLAST gene expression and GAD gene expression in Cerebral Cortex of control and experimental rats

- Glutamate content in the cerebral cortex of control and experimental rats
- Glutamate Dehydrogenase Assay in cerebral cortex of control and experimental rats
- Real time PCR amplification of GLAST mRNA from the cerebral cortex of control and experimental rats
- Real time PCR amplification of GAD mRNA from the cerebral cortex of control and experimental rats

NMDA and AMPA receptor function in cerebral cortex of control and experimental rats

- Scatchard analysis of NMDA receptor using $[^3]H$ MK-801 binding against MK-801 in the cerebral cortex of control and experimental rats
- Scatchard analysis of AMPA receptor using $[^3]H$AMPA binding against AMPA in the cerebral cortex of control and experimental rats
- Real time PCR amplification of NMDA R1 receptor subunit mRNA from the cerebral cortex of control and experimental rats
Real time PCR amplification of NMDA 2B receptor subunit mRNA from the cerebral cortex of control and experimental rats 81

Real time PCR amplification of GluR2 subunit of AMPA receptor mRNA from the cerebral cortex of control and experimental rats 81

NMDA R1 receptor subunit expression in the cerebral cortex of control and experimental rats using confocal microscope 81

NMDA 2B receptor subunit expression in the cerebral cortex of control and experimental rats confocal microscope 81

AMPA (GluR2) receptor subunit expression in the cerebral cortex of control and experimental rats confocal microscope 82

IP3 content in cerebral cortex of control and experimental rats 82

Study of anti-apoptotic action of Withania somnifera, Withanolide-A and Carbamazepine using Bax gene expression, Caspase 8 gene expression and Akt gene expression in cerebral cortex of control and experimental rats 82

Real time PCR amplification of Bax mRNA from the cerebral cortex of control and experimental rats 82

Real time PCR amplification of Caspase 8 mRNA from the cerebral cortex of control and experimental rats 83

Real time PCR amplification of Akt-1 mRNA from the cerebral cortex of control and experimental rats 83

Cerebellum

Study of antioxidant potential of Withania somnifera, Withanolide-A and carbamazepine using TBARS assay, SOD assay, CAT assay, SOD gene expression and Gpx gene expression in cerebellum of control and experimental rats 84

Lipid peroxidation assay in the cerebellum of control and experimental rats 84

Superoxide dismutase assay in the cerebellum of control and experimental rats 84

Catalase assay in cerebellum of control and experimental animals 84

Real time PCR amplification of SOD mRNA from the cerebellum of control and experimental rats 85

Real time PCR amplification of GPx mRNA from the
Study of altered Glutamate synthesis, transport and metabolism using Glutamate content, GDH assay, GLAST gene expression and GAD gene expression in cerebellum of control and experimental rats

Glutamate content in the cerebellum of control and experimental rats

Glutamate Dehydrogenase Assay in Cerebellum of control and experimental rats

Real time PCR amplification of GLAST mRNA from cerebellum of control and experimental rats

Real time PCR amplification of GAD mRNA from cerebellum of control and experimental rats

NMDA and AMPA receptor function in cerebellum of control and experimental rats

Scatchard Analysis of NMDA receptor using $[^3]H$ MK-801 binding against MK-801 in the cerebellum of control and experimental rats

Scatchard analysis of AMPA receptor using $[^3]H$AMPA binding against AMPA in the cerebellum of control and experimental rats

Real time PCR amplification of NMDA R1 receptor mRNA from the cerebellum of control and experimental rats

Real time PCR amplification of NMDA 2B receptor mRNA from the cerebellum of control and experimental rats

Real time PCR amplification of GluR2 subunit of AMPA receptor mRNA from cerebellum of control and experimental rats

NMDA R1 receptor antibody staining in cerebellum of control and experimental groups of rats using confocal microscope

NMDA 2B receptor antibody staining in cerebellum of control and experimental groups of rats using confocal microscope

AMPA (GluR2) receptor subunit antibody staining in cerebellum of control and experimental groups of rats using confocal microscope

IP3 content in the cerebellum of control and experimental rats
Study of anti-apoptotic action of Withania somnifera, Withanolide-A and Carbamazepine using Bax gene expression, Caspase 8 gene expression and Akt gene expression in cerebellum of control and experimental rats

Real time PCR amplification of Bax mRNA from the cerebellum of control and experimental rats
Real time PCR amplification of Caspase 8 mRNA from the cerebellum of control and experimental rats
Real time PCR amplification of Akt-1mRNA from the cerebellum of control and experimental rats

**Brain Stem**

Study of antioxidant potential of Withania somnifera, Withanolide-A and Carbamazepine using TBARS assay, SOD assay, CAT assay, SOD gene expression and Gpx gene expression in brain stem of control and experimental rats

Lipid peroxidation assay in the Brain stem of control and experimental rats
Superoxide dismutase assay in the Brain stem of control and experimental rats
Catalase assay in Brain stem of control and experimental animals
Real time PCR amplification of SOD mRNA from the Brain stem of control and experimental rats
Real time PCR amplification of GPx mRNA from the Brain stem of control and experimental rats

Study of altered Glutamate synthesis, transport and metabolism using Glutamate content, GDH assay, GLAST gene expression and GAD gene expression in brain stem of control and experimental rats

Glutamate content in the Brain stem of control and experimental rats
Glutamate Dehydrogenase Assay in Brain stem of control and experimental rats
Real time PCR amplification of GLAST mRNA from Brain stem of control and experimental rats
Real time PCR amplification of GAD mRNA from Brain stem of control and experimental rats
NMDA and AMPA receptor function in brain stem of control and experimental rats

Scatchard Analysis of NMDA receptor using [3H] MK-801 binding against MK-801 in the Brain stem of control and experimental rats

Scatchard analysis of AMPA receptor using [3H]AMPA binding against AMPA in the Brain stem of control and experimental rats

Real time PCR amplification of NMDA R1 receptor mRNA from the Brain stem of control and experimental rats

Real time PCR amplification of NMDA 2B receptor mRNA from the Brain stem of control and experimental rats

Real time PCR amplification of GluR2 subunit of AMPA receptor mRNA from Brain stem of control and experimental rats

NMDA R1 receptor antibody staining in Brain stem of control and experimental groups of rats using confocal microscope

NMDA 2B receptor antibody staining in Brain stem of control and experimental groups of rats using confocal microscope

AMPA (GluR2) receptor subunit antibody staining in Brain stem of control and experimental groups of rats using confocal microscope

IP3 content in the Brain stem of control and experimental rats

Study of anti-apoptotic action of Withania somnifera, Withanolide A and carbamazepine using Bax gene expression, Caspase 8 gene expression, Akt gene expression and Phospho-Akt expression in brain stem of control and experimental rats

Real time PCR amplification of Bax mRNA from the Brain stem of control and experimental rats

Real time PCR amplification of Caspase 8 mRNA from the Brain stem of control and experimental rats

Real time PCR amplification of Akt-1 mRNA from the Brain stem of control and experimental rats
