ACKNOWLEDGMENT

It is my great pleasure and privilege to acknowledge and express my deep sense of gratitude to my guide Dr. P.B. Mahapatra, Professor & Head, Department of Mechanical Engineering, Punjab Engineering College, Chandigarh. He has always been kind enough to spare his valuable time and thoughts in giving the necessary guidance. He inspired and motivated me all the time to produce a valuable work, despite his busy schedule.

I am highly grateful to my co-guide Dr. K. Muralidhar, Professor, Department of Mechanical Engineering, Indian Institute of Technology, Kanpur (IIT Kanpur) for his continuous guidance and involvement in the work. His rich and varied experience as an academician immensely helped me in understanding this problem clearly. Without his constant involvement and inspiration, this work could not be imagined and finished. He had been very kind and inspiring during all of my visits to IIT Kanpur.

I owe my thanks to Sh. Manmohan Singh, Dr. H.L. Chhatwal and others at Defence Research and Development Organization Laboratory for showing the details of the working machine in their laboratory.

I express my sincere thanks to my co-guide Dr. V.P. Singh, Assistant Professor, Mechanical Engineering Department, Punjab Engineering College, Chandigarh for his constant encouragement and help in this work.

I am highly obliged to Dr. R. Sehmi, Assistant Professor, Applied Sciences Department, Punjab Engineering College, Chandigarh for providing me help in solving the very complex mathematical equations.

I am thankful to the research scholars associated with Dr. K. Muralidhar, who always lent a helping hand in providing me comfortable working space, accommodation and making me learn the new softwares during my visits to IIT Kanpur.

I am thankful to the faculty and staff of the department of Aeronautical and Mechanical Engineering, Punjab Engineering College, Chandigarh who helped me in their own way.
I am highly indebted to my wife and my son, who always motivated me and happily sacrificed a lot in their personal lives for making this work a success.

Words are insufficient to express my profound sense of gratitude to my parents. Their encouragement and blessings gave me a moral strength throughout my career. Not even a single telephone call went without my father showing a concern in the successful completion of this work.

I am also thankful to all the people who directly or indirectly helped me in doing this work and above all THE ALMIGHTY.

(Tejinder Kumar)
