CHAPTER 4: ROPAR WETLAND AND ITS GEOENVIRONMENTAL PROBLEMS

4.1: Introduction ........................................... 153-154
4.2: Wetlands loss and degradation ..................... 154-155
4.3: Global scenario of wetlands ....................... 155-159
4.4: Indian scenario of wetlands ....................... 159-160
4.5: Distribution of wetlands in India ................ 160-164
4.6: Impacts and status of wetlands in India .......... 164-165
4.7: Distribution of wetlands in Punjab ............... 165-167
4.8: Status of wetlands in Punjab ..................... 167-168
4.9: Ropar wetland ........................................ 168-170
4.9.1: Physiography of Ropar wetland ............... 170-172
4.10: Importance of Ropar wetland .................... 173
4.10.1: Ecological Importance ......................... 173
4.10.2: Hydrological Significance .................... 173-174

Hydrochemical facies for surface water ............... 151-152
4.10.3: Socio-economic values........................................ 174
4.11: Threats and geo-environmental problems of Ropar
wetland......................................................................... 175
4.11.1: Pollution.......................................................... 175-177
4.11.1: 1 Discussion of chemical quality of wetland
water.............................................................................. 175-177
4.11.2: Encroachment of wetland area for agricultural
activities........................................................................ 195-197
4.11.3: Siltation............................................................... 197-198
4.11.4: Poaching............................................................ 198-199
4.11.5: Prolific growth of aquatic plants......................... 199-200
4.12: Action plan............................................................ 200-201

CHAPTER 5: RAINWATER HARVESTING STRUCTURES AND
THEIR IMPACT......................................................... 202-230
5.1: Introduction......................................................... 202-205
5.2: Approach and methodology.................................. 205
5.2.1: Selection of sample rainwater harvesting............ 205-206
5.2.2: Selection of sample households.......................... 206
5.3: Results and discussion......................................... 206
5.3.1: Impact on agriculture........................................ 207-212
5.3.1.1: Yield of crops............................................... 212-214
5.3.2: Impact on animal husbandry............................. 214-215
5.3.2.1: Change in cattle composition and milk yield.... 215-216
5.3.2.2: Impact on milk production............................. 217-218
5.3.3: Impact on social status...................................... 218-219
5.3.3.1: Ownership of house...................................... 219
5.3.3.2: Type of dwelling............................................ 219-220
5.3.3.3: Electricity...................................................... 221
5.3.3.4: Assets possessed by the families..................... 221-222
5.3.4: Status of women............................................... 222-223

V
5.3.4.1: Educational status of women...................... 223-224
5.3.4.2: Awareness among village women..................... 225
5.3.4.3: Participation of women in different activities... 225-226
5.4: Impact on hydro-geological environment............... 227-229
5.5: Summary............................................. 229-230

CHAPTER 6: SUMMARY AND CONCLUSIONS.................... 231-245

REFERENCES 246-277

LIST OF TABLES

Table 1.1: Block wise village area and number of villages of district Rupnagar
Table 1.2: Classification of climatic provinces according to Thornthwaite (1948)
Table 1.3: Details of monthly rainfall data (mm) recorded at various rain gauges stations in Rupnagar District from 2005-2006.
Table 1.4: Details of annual rainfall data (mm) recorded at various rain gauges stations in Rupnagar District from 1990-2005.
Table 1.5: Geological succession of the study area
Table 1.6: Showing rural population in the study area
Table 1.7: Showing urban population in the study area
Table 1.8: Showing description of land use in the study area
Table 1.9: Details of area under principal crops in district Rupnagar
Table 1.10: Methodology used for the assessment of water quality parameters
Table 2.1: Type of data used
Table 2.2: Land use land cover classification scheme
Table 2.3: Rupnagar district: Land Use
Table 2.4: Land Use/Land Cover Change assessment from 1960 to 2005
Table 2.5: Land Use/Land Cover Change assessment from 1992 to 2005
Table 3.1: Showing concentrations of major elements in groundwater of study area
Table 3.2: Suitability of irrigation water in terms of conductivity
Table 3.3: Showing degree of salinity with respect to TDS
Table 3.4: Showing sodium percent water class for groundwater of the study area (Wilcox, 1955)
Table 3.5: Water quality classification of the irrigation waters according to U.S. Salinity Laboratory Staff (1954)
Table 3.6: Sodium hazard classes based on USSL Classification for groundwater of the Study area
Table 3.7: Salinity hazard classes based on USSL Classification for groundwater of the Study area
Table 3.8: Guidelines for evaluation of quality of irrigation water
Table 3.9: Showing classification of water based on RSC value, after Ayers and Wescott (1985)
Table 3.10: Criteria used for rating of groundwater in Rupnagar district
Table 3.11: Showing characteristics of hardness of water
Table 3.12: Recommended limit of fluoride in drinking water
Table 3.13: Effect of fluoride on human health
Table 3.14: Quality of groundwater based on Piper Trilinear diagram
Table 3.15: Health effects of heavy metal
Table 3.16: Results of trace element analysis of groundwater from Rupnagar district
Table 3.17: Showing concentrations of major elements in surface water of study area
Table 3.18: Sodium percent water class (Wilcox, 1955) for surface water
Table 3.19: Sodium hazard classes based on USSL classification (Surface water)
Table 3.20: Salinity Hazard Classes (Surface water)
Table 3.21: Showing Classification of water based on RSC value, after Ayers and Wescott (1985) for surface water of the study area
Table 4.1: Showing distribution of world water resources (wetlands occupying 0.0001% of total water)
Table 4.2: Showing distribution of fresh water resources by continents
Table 4.3: Wetlands functions and their human utilization (Hollis et al., 1987)
Table 4.4: Showing distribution of wetlands in India
Table 4.5: Ropar wetland: land use categories
Table 4.6: Geochemical analysis results of water samples from Ropar wetland
Table 4.7: Heavy metal analysis of wetland water samples
Table 5.1: Salient features of water harvesting structures falling in Kandi zone of Rupnagar district
Table 5.2: Rainwater harvesting structures selected for the study area
Table 5.3: Number of sample households surveyed in the sample rainwater harvesting structures
Table 5.4: Changes in cropping pattern (rabi, winter season) due to rainwater harvesting programme (area in ha) in the study area
Table 5.5: Changes in cropping pattern (kharif, summer season) due to rainwater harvesting programme (area in ha) in the study area
Table 5.6: Average yield (kg/ha) of major crops in sample villages
Table 5.7a: Cattle population before and after the project in village Chotti-Bari Naggal
Table 5.7b: Cattle population before and after the project in village Parrol Naggal
Table 5.8: Total per day production market surplus and home consumption of milk (litres) before and after the project implementation
Table 5.9: Distribution of ownership of housing among the sample households surveyed after the project
Table 5.10: Distribution of sample households surveyed by the type of dwelling
Table 5.11: Distribution of sample households by the availability of electricity
Table 5.12: Assets possessed by the families before and after the project
Table 5.13: Occupational patterns of the sample population by primary occupation and gender after the project
Table 5.14: Showing distribution of sample population by gender across the different educational levels
Table 5.15: Number of farm women going to forest area/agricultural fields for fetching fodder before and after the project implementation
