LIST OF TABLES

Table No. Description Page
5.1.1 Co-efficients of correlation matrix of mental health, moral 84
        judgement, intelligence and parental behaviour of total sample.
5.1.2 Co-efficients of correlation matrix of mental health, moral 87
        judgement, intelligence and parental behaviour school
        adolescents with high level of mental health.
5.1.3 Co-efficients of correlation matrix of mental health, moral 89
        judgement, intelligence and parental behaviour school
        adolescents with average level of mental health.
5.1.4 Co-efficients of correlation matrix of mental health, moral 91
        judgement, intelligence and parental behaviour school
        adolescents with low level of mental health.
6.1.1 Mean differentials in moral judgement, intelligence and parental 97
        behaviour of school adolescents (total sample) with high and
        average level of mental health.
6.1.2 Mean differentials in moral judgement, intelligence and parental 97
        behaviour of school adolescents (total sample) with high and
        low level of mental health.
6.1.3 Mean differentials in moral judgement, intelligence and parental 98
        behaviour of school adolescents (total sample) with average and
        low level of mental health.
6.1.4 Mean differentials in moral judgement, intelligence and parental 102
        behaviour of male adolescents with high and average level of
        mental health.
6.1.5 Mean differentials in moral judgement, intelligence and parental 102
        behaviour of male adolescents with high and low level of mental
        health.
6.1.6 Mean differentials in moral judgement, intelligence and parental behaviour of male adolescents with average and low level of mental health.

6.1.7 Mean differentials in moral judgement, intelligence and parental behaviour of female adolescents with high and average level of mental health.

6.1.8 Mean differentials in moral judgement, intelligence and parental behaviour of female adolescents with high and low level of mental health.

6.1.9 Mean differentials in moral judgement, intelligence and parental behaviour of female adolescents with average and low level of mental health.

6.1.10 Mean differentials in moral judgement, intelligence and parental behaviour of male and female adolescents with high level of mental health.

6.1.11 Mean differentials in moral judgement, intelligence and parental behaviour of male and female adolescents with average level of mental health.

6.1.12 Mean differentials in moral judgement, intelligence and parental behaviour of male and female adolescents with low level of mental health.

6.2.1 Mean differentials in moral judgement, intelligence and parental behaviour of Government and Private school adolescents with high level of mental health.

6.2.2 Mean differentials in moral judgement, intelligence and parental behaviour of Government and Private school adolescents with average level of mental health.

6.2.3 Mean differentials in moral judgement, intelligence and parental behaviour of Government and Private school adolescents with low level of mental health.
6.2.4 Mean differentials in moral judgement, intelligence and parental behaviour of Government school adolescents with high and average level of mental health.

6.2.5 Mean differentials in moral judgement, intelligence and parental behaviour of Government school adolescents with high and low level of mental health.

6.2.6 Mean differentials in moral judgement, intelligence and parental behaviour of Government school adolescents with average and low level of mental health.

6.2.7 Mean differentials in moral judgement, intelligence and parental behaviour of Private school adolescents with high and average level of mental health.

6.2.8 Mean differentials in moral judgement, intelligence and parental behaviour of Private school adolescents with high and low level of mental health.

6.2.9 Mean differentials in moral judgement, intelligence and parental behaviour of Private school adolescents with average and low level of mental health.

6.3.1 Mean differentials in moral judgement, intelligence and parental behaviour of Government school male adolescents with high and average levels of mental health.

6.3.2 Mean differentials in moral judgement, intelligence and parental behaviour of Government school male adolescents with high and low levels of mental health.

6.3.3 Mean differentials in moral judgement, intelligence and parental behaviour of Government school male adolescents with average and low levels of mental health.

6.3.4 Mean differentials in moral judgement, intelligence and parental behaviour of Government school female adolescents with high and average levels of mental health.
6.3.5 Mean differentials in moral judgement, intelligence and parental behaviour of Government school female adolescents with high and low levels of mental health.

6.3.6 Mean differentials in moral judgement, intelligence and parental behaviour of Government school female adolescents with average and low levels of mental health.

6.3.7 Mean differentials in moral judgement, intelligence and parental behaviour of Government school male adolescents with high and average levels of mental health.

6.3.8 Mean, SD and t-values of Private school male and female adolescents regarding their moral judgement, intelligence and parental behaviour at average levels of mental health.

6.3.9 Mean, SD and t-values of Private school male and female adolescents regarding their moral judgement, intelligence and parental behaviour at low levels of mental health.

6.4.1 Mean, SD and t-values of Government school male adolescents regarding their moral judgement, intelligence and parental behaviour at high and average levels of mental health.

6.4.2 Mean, SD and t-values of Government school male adolescents regarding their moral judgement, intelligence and parental behaviour at high and low levels of mental health.

6.4.3 Mean, SD and t-values of Government school male adolescents regarding their moral judgement, intelligence and parental behaviour at average and low levels of mental health.

6.4.4 Mean, SD and t-values of Government school female adolescents regarding their moral judgement, intelligence and parental behaviour at high and average levels of mental health.
6.4.5 Mean, SD and t-values of Government school female adolescents regarding their moral judgement, intelligence and parental behaviour at high and low levels of mental health.

6.4.6 Mean, SD and t-values of Government school female adolescents regarding their moral judgement, intelligence and parental behaviour at average and low levels of mental health.

6.4.7 Mean, SD and t-values of male and female adolescents of Government school regarding their moral judgement, intelligence and parental behaviour at high levels of mental health.

6.4.8 Mean, SD and t-values of male and female adolescents of Government school regarding their moral judgement, intelligence and parental behaviour at average levels of mental health.

6.4.9 Mean, SD and t-values of male and female adolescents of Government school regarding their moral judgement, intelligence and parental behaviour at low levels of mental health.

6.5.1 Mean, SD and t-values of male adolescents of Government and Private school regarding their moral judgement, intelligence and parental behaviour at high levels of mental health.

6.5.2 Mean, SD and t-values of male adolescents of Government and Private school regarding their moral judgement, intelligence and parental behaviour at average levels of mental health.

6.5.3 Mean, SD and t-values of male adolescents of Government and Private school regarding their moral judgement, intelligence and parental behaviour at low levels of mental health.

6.5.4 Mean, SD and t-values of female adolescents of Government and Private school regarding their moral judgement, intelligence and parental behaviour at high levels of mental health.
6.5.5 Mean, SD and t-values of female adolescents of Government and Private school regarding their moral judgement, intelligence and parental behaviour at average levels of mental health.

6.5.6 Mean, SD and t-values of female adolescents of Government and Private school regarding their moral judgement, intelligence and parental behaviour at low levels of mental health.

7.1.1 R-value and F-ratio for the total sample.

7.1.2 R-value and F-ratio for the high level of mental health of school adolescents.

7.1.3 R-value and F-ratio for the average level of mental health of school adolescents.

7.1.4 R-value and F-ratio for the low mental health level of school adolescents.
