Acknowledgments

I would like to sincerely thank Dr. B. T. Achyutha for providing the opportunity to perform this work under his guidance. I have benefited a lot from his constructive suggestions regarding the research work throughout the course. I am greatly indebted to him for his critical review of my research work at each and every level. I feel extremely fortunate to work under him.

I would also like to express my indebtedness to my co-guide Dr. B. Siddeswarappa for his support, contributions and timely help for this work. I have greatly benefited from frequent and stimulating discussions with him. He is always been a source of inspiration to me.

My most sincere acknowledgments go to my dear colleague and closest friend S. R. Karnik for his remarkable wisdom and valuable guidance. He has been an excellent source of direction throughout this research. I want to express my special gratitude to him for introducing me to the subject genetic algorithms. His patience, continuous support and guidance from the beginning helped me to carry out this research. He helped me through my first difficult years and I would not have persisted without his help and encouragement. I am very grateful to him for his interests and valuable comments on my work.

I would like to thank Dr. Sureshchandra Mohan, Principal and Dr. G. P. Prabhukumar, retired Principal, U. B. D. T. C. E., Davanagere for having provided the required facilities to conduct the experimental work. I am grateful to the teaching faculty and the technical staff of Mechanical and Industrial & Production Engineering Departments of U. B. D. T. C. E., Davangere, for their constant support and help during the course of the work. My special gratitude goes to Arun K. V., Faculty, Industrial & Production Engineering Department of U. B. D. T. C. E., Davangere, Dr. S. Subrahmanya Swamy and Dr. Ramesh
Rao, Faculty, Mechanical Engineering Department of B. I. E. T. Davangere for their moral support and timely help during my research.

I am grateful to Dr. Ashok S. Shettar, Principal, B. V. B. College of Engineering and Technology, Hubli for his inspiration and extending timely support and resources during the research period. It is my great pleasure to thank my colleagues at the Industrial and Production Engineering Department of B. V. B. College of Engineering and Technology, Hubli, in particular V. A. Raikar, B. B. Kotturshettar, R. G. Mench, B. S. Kakol, S. B. Burli and V. B. Bagodi who have contributed to my professional and academic growth in some or the other way. I am thankful to Sudhir Nayak, S. S. Hebballi, S. S. Biradar, Kiran R., Amaresh A. B., M. S. Halli, Manjunath S., Gangadhar B., Rahutappa M., Hanumanthappa H. and Vikram S. for their services and assistance rendered during the research work.

I acknowledge with gratitude the support of Mr. Tushar Vikamshi of M/S Micro Finish Valves, Limited, Hubli for the experimental setup and help rendered during the part of the experimental investigations. Special thanks are also due to supply of work materials and cutting tools. My sincere thanks go to PG students Sujay Joshi, C. B. Prakash, Ravi Guttal, Srinath Deshpande, Prabhu D., V. V. Devadas and S. I. Kundagol for their assistance in conducting the experiments.

Last but not the least, I would like to thank my wife, parents, brother and sister for their patience and encouragement throughout my doctoral study.
