Acknowledgement

The author wishes to place on record his indebtedness to Dr. M.D. Parthasarathy, M.Sc., Ph.D., F.Z.S., Department of Zoology, Bangalore University, Bangalore, for kindly suggesting and seeing the problem through and for his continued and ever-constant guidance throughout the tenure of this work.

The author further wishes to thank Dr. H. Sharatchandra, School of Human Genetics, Bangalore, for his kind suggestions in Cytological research, and Grand Island Biological Company, New York, that so kindly sent the samples of chromosome medium, without which the cytological studies would have remained undone.

The author is indebted to the C.S.I.R., Rafi Marg, New Delhi-1, for the financial aid that was provided to carry out research from August 1964 till June 1967, thus enabling to launch on this type of work. His thanks are also due to Bangalore University, Bangalore, for the Research Assistantship that was granted to him which has enabled him to complete the work.

The author is deeply grateful to Professor K. Pampapathi Rao, Head of the Department of Zoology, Bangalore University, Bangalore, for his kindness in providing the required facilities, constant encouragement and wise counsel in the progress of this thesis and the research work.
