Acknowledgments

I express profound gratitude to my supervisors Dr. G. P. S. Raghava, Bioinformatics Centre, Institute of Microbial Technology, Chandigarh and Dr. F. S. Nandel, Department of Biophysics, Panjab University for their constant supervision of my work, continuous encouragement as well as financial and moral support. The steady motivation and constructive suggestions offered by them helped me to bring my work to present form.

I feel highly grateful to Dr. Amit Ghosh, Director, Institute of Microbial Technology, Chandigarh and Dr. S. N. Sanyal, Chairman, Department of Biophysics, Panjab University for providing excellent research facilities and administrative support. I would also like to thank the scientific, library and administrative staff of IMTECH and the faculty of Biophysics Department especially Dr. Uma Singh and Dr. M. L. Garg for their constant moral support.

I appreciate the research group in which I spent these years. I thank Dr. Balvinder Singh and Dr. R. Kishore for the lively discussions and ideas. A big thank to Mr. Biju Issac for all his help and strength to hold on. My deep thank to Mr. Manoj Bhasin for his constant help and offering his valuable time during the thesis compilation. I am deeply grateful to my lab colleagues Mr. Sudipto Saha and Mr. Manish for their constant presence and help and who have made my working time more pleasant. I recall our times together in research group and several years of friendship and wish to thank you for all the help and advice.

My deep appreciation goes to the technical staff of Bioinformatics Centre, IMTECH especially Mr. Amit Kush, Mr. Amit Bhandari, Mr. Jitin Arora, Mr. Mahinder and Mr. Rajeev for their technical assistance and cooperation in solving many computer problems throughout the time spent working on my Ph.D. I thank everyone at Bioinformatics Center where most of the research of this thesis is carried out.

Thanks are also expressed to my friends Vikas, Harpreet Singh, Sharanjot, Baldeep, Tranum, Ritu, Arvind, Lakshmipathi, Jayeeta, Pooja, Jasdeep, Saurabh, Aarti, Navjot, Shalini, Tejinder, Jyoti who have contributed in many ways. I am thankful to Indu Kohaar, Harbeen Sidhu, Amandeep, Anchal, Geetanjali and Juhi because of whom my stay in Sarojini Hostel became enjoyable.
The financial support was provided by Department of Biotechnology, New Delhi and is duly acknowledged. I am also thankful to the developers of SNNS, PEBLS, Weka and HBexplore packages that are used extensively in this work. I am grateful to Dr. Adrian Shepherd, Birkbeck College, London for BTPRED data, Dr. David Jones, UCL, London for PSIPRED data, Dr. K. C. Chou, Pharmacia and Upjohn, Michigan for data of α-turns, Dr. M.P. Williamson, University of Sheffield, U.K. for ‘Total’ program and M. Madan Babu, Cambridge, UK for assisting me in the identification of Cα-H···π interactions in proteins.

Finally I would like to pay tribute to the constant support of my parents, brothers Iqbal and Navtej, have always believed in me and supported me and whose sacrifice I can never repay.

My apologies to the others who I have not mentioned by name, I am indebted to them for the many ways they helped me. Thanks!

(Harpreet Kaur Saini)
