

LIST OF TABLES

	Page No.
Table 1. Details of aquatic hypomycetes during 2009-10	39
Table 2. Details of aquatic hypomycetes during 2010-11	43
Table 3. Details of aquatic hypomycetes during 2011-12	46
Table 4. Percentage isolated species during 2009 to 2012	66
Table 5. Total number of species cultured from different leaves species	71
Table 6. Fungal diversity in fresh water habitats	87
Table 7. Seasonal variation of species diversity during 2009-1	90
Table 8. Seasonal variation of species diversity during 2010-11	90
Table 9. Seasonal variation of species diversity during 2011-12	90
Table 10. Physico-chemical parameters during pre-monsoon season, 2009-10	95
Table 11. Physico-chemical parameters during monsoon season, 2009-10	96
Table 12. Physico-chemical parameters during post-monsoon season, 2009-10	97
Table 13. Physico-chemical parameters during pre-monsoon season, 2010-11	98
Table 14. Physico-chemical parameters during monsoon season, 2010-11	99
Table 15. Physico-chemical parameters during post-monsoon season, 2010-11	100
Table 16. Physico-chemical parameters during pre-monsoon season, 2011-12	101

Table 17.	Physico-chemical parameters during monsoon season, 2011-12	102
Table 18.	Physico-chemical parameters during post-monsoon season, 2011-12	103
	<i>In-situ</i> method	
Table 19.	Percentage of degradation rate in <i>Bamboo</i> sp.	108
Table 20.	Percentage of degradation rate in <i>Terminalia paniculata</i>	109
Table 21.	Percentage of degradation rate in <i>Terminalia arjuna</i>	109
Table 22.	Percentage of degradation rate in <i>Pongamia pinnata</i>	109
Table 23.	Percentage of degradation rate in <i>Acacia auriculiformis</i>	110
	<i>Ex-situ</i> method	
Table 24.	Percentage of degradation rate in <i>Bamboo</i> sp.	110
Table 25.	Percentage of degradation rate in <i>Terminalia paniculata</i>	110
Table 26.	Percentage of degradation rate in <i>Terminalia arjuna</i>	111
Table 27.	Percentage of degradation rate in <i>Pongamia pinnata</i>	111
Table 28.	Percentage of degradation rate in <i>Acacia auriculiformis</i>	111
