</table>
4.0.4 Shows the reasons for taking drugs as central nervous system depressants
4.0.5 Shows percentage of drug users for taking and non-taking drugs used as central nervous system stimulants.
4.0.6 Shows the type of drugs used as central nervous system stimulants
4.0.7 Shows frequency of drugs used as central nervous system stimulants
4.0.8 Shows the reason for taking drugs as central nervous system stimulants
4.0.9 Shows percentage of drug users for taking and non-taking drugs used as central nervous system analgesic and hallucinogens
4.0.10 Shows the types of drugs used as central nervous system analgesic and hallucinogen
4.0.11 Shows frequency of drugs used as central nervous system analgesic and hallucinogens
4.0.12 Shows the reasons for taking drugs as central nervous system analgesic and hallucinogens
4.0.13 Shows percentage of drug users for taking and non-taking drugs used as having side effects on the body
4.0.14 Shows the types of drugs used as having side effects on the body
4.0.15 Shows frequency of drugs used as having side effects on the body
4.0.16 Shows the reasons for taking drugs as having side effects on the body

4.1.1. Percentage comparison between for drug users and non-drug users on the variables of three substances of Good component of mental health

4.1.2. Percentage comparison between for drug users and non-drug users on the variables of three substance of Intelligence component of mental health

4.1.3. Percentage comparison between for drug users and non-drug users on the variables of three substances of Happiness component of mental health

4.1.4. Discussion based on descriptive analysis of academic achievement

4.2.1 Discussion based on comparison between Mean, SD and t-value for mental health variable of drug users and non-drug users

4.2.2 Discussion based on comparison between Mean, SD and t-value for academic achievement variable of drug users and non-drug users

4.3.1 Correlation between mental health and academic achievement of drug users

4.3.2 Coefficient of correlation between sub variables of self-control of mental health and academic achievement of drug users
4.3.3  Coefficient of correlation between sub variables of great-sympathy to others of mental health and academic achievement of drug users

4.3.4  Coefficient of correlation between sub-variables of responsibility of mental health and academic achievement of drug users

4.3.5  Coefficient of correlation between sub-variables of motivation of mental health and academic achievement of drug users

4.3.6  Coefficient of correlation between sub-variables of deciding and solving problem of mental health and academic achievement of drug users

4.3.7  Coefficient of correlation between sub-variables of relationship of mental health and academic achievement of drug users

4.3.8  Coefficient of correlation between sub-variables of self-proud of mental health and academic achievement of drug users

4.3.9  Coefficient of correlation between sub-variables of satisfaction in life of mental health and academic achievement of drug users

4.3.10 Coefficient of correlation between sub-variables of peace in mind of mental health and academic achievement of drug users
4.3.11 Correlation between mental health and academic achievement of non-drug users

4.3.12 Coefficient of correlation between sub variables of self-control of mental health and academic achievement of non-drug users

4.3.13 Coefficient of correlation between sub variables of great-sympathy to others of mental health and academic achievement of non-drug users

4.3.14 Coefficient of correlation between sub variables of responsibility of mental health and academic achievement of non-drug users

4.3.15 Coefficient of correlation between sub variables of motivation of mental health and academic achievement of non-drug users

4.3.16 Coefficient of correlation between sub variables of deciding and solving problem of mental health and academic achievement of non-drug users

4.3.17 Coefficient of correlation between sub variables of relationship of mental health and academic achievement of non-drug users

4.3.18 Coefficient of correlation between sub variables of self-proud of mental health and academic achievement of non-drug users
4.3.19 Coefficient of correlation between sub variables of satisfaction in life of mental health and academic achievement of non-drug users

4.3.20 Coefficient of correlation between sub variables of peace in mind of mental health and academic achievement of non-drug use

4.4.1 Correlation between mental health and academic achievement of sample

4.4.2 Coefficient of correlation between sub variables of self-control of mental health and academic achievement of sample

4.4.3 Coefficient of correlation between sub variables of great-sympathy to others of mental health and academic achievement of sample

4.4.4 Coefficient of correlation between sub variables of responsibility of mental health and academic achievement of sample

4.4.5 Coefficient of correlation between sub variables of motivation of mental health and academic achievement of sample

4.4.6 Coefficient of correlation between sub variables of deciding and solving problem of mental health and academic achievement of sample

4.4.7 Coefficient of correlation between sub variables of relationship of mental health and academic achievement of sample
4.4.8 Coefficient of correlation between sub
variables of self-proud of mental health and
academic achievement of sample

4.4.9 Coefficient of correlation between sub
variables of satisfaction in life of mental
health and academic achievement of sample

4.4.10 Coefficient of correlation between sub
variables of peace in mind of mental health
and academic achievement of sample
