ACKNOWLEDGEMENTS

When I look back several faces appear before my eyes, whom I owe a debt of gratitude.

I take the opportunity to express my deep sense of gratitude to my supervisor, Dr. (Mrs.) Pushpinder Syal, Chairperson, Department of English, Panjab University, Chandigarh, for her most valuable guidance, fruitful and stimulating discussions, incessant support and encouragement, and clearing the way for the smooth running of this work during the hard times.

Thanks are due to Prof. Rafiyan, Vice Chancellor, Islamic Azad University, Tabriz Branch, Tabriz, who permitted me to have access to the students for my experiments. I owe special thanks to Mr. Ghalami Nobar, Language Lab Assistant, and Ms. Naseri, Instructor, in the university for their sincere cooperation during the process of data collection for this study. My thanks go to the students of the first and final semesters of the academic year 1995-96, for their appreciable participation in the project.

It gives me pleasure to place on the record the debt of gratitude that I owe to all of my friends who helped me in a number of ways. Special thanks go to Mr. Hossein Jabbari Khamnei, Research Scholar, in the Department of Statistics, Panjab University, for his sincere and active involvement in the statistical analysis of my data.

I am very grateful to Prof. Elaine Tarone, University of Minnesota, USA, for sending me the manuscripts, offprints, and copies of her latest publications.

Words fail me to express my immense gratitude and deep indebtedness to my brother, Dr. Khalil Ansarin, for his wise guidelines and constant financial support throughout my stay and study in India, without whose generosity it would not have been possible for me to translate my dream into reality. Finally, I shall be failing in my duty if I do not thank other members of my family who have been a source of constant moral support throughout this research effort.

Ali Akbar Ansarin
