APPENDIX-VI

RULES FOR THE GUIDANCE OF STAFF AT ‘RISHI VALLEY SCHOOL’

Under no circumstances should a child be beaten, either by the teacher or the house parent. If, under extreme provocation a staff member resorts to beating a student, this should immediately be reported to the principal or the Head Master. We hope it will not be done as it is against the law.

The person and property of the child should be protected and respected by the House parent and the teacher.

Fear is not an instrument of education. The teacher should establish the right relationship with the student and earn his confidence and trust.

The assemblies are part of the school programme. Teachers are expected to be present at the assemblies. Teachers of the junior School should attend the junior assemblies.

It is very important to be punctual to the classes, prepare one’s lessons, mark note books regularly, and keep upto date, wherever possible, with the subject one teachers.

The teachers are advised to keep a diary which indicates the progress of the children, difficulties experienced by them, problems of the weaker students and steps taken to help them.

Gifted and sensitive students should be taken note of and brought to the notice of other children as well, so that they are given enough guidance and care. The school does not encourage competition as a way of learning.

The school provides vegetarian food and one is not expected to eat meat, drink or smoke on the campus.

The boys and girls enjoy considerable freedom here. They are free to form friendships, but should not develop attachment which leads to sex adventure.
