PLATES

1. A human disturbance map
2. Areas with higher levels of biodiversity
3. Location of the study area
4. Bioclimatic zones of Chikmagalur district
5. Satellite image depicting samples of landscape parameters
6. Approach for disturbance index and biological richness mapping
7. Satellite image of Chikmagalur district
8. Vegetation type map of Chikmagalur district
9. Disturbance index parameters
10. Disturbance index image of Chikmagalur district
11. Biological richness parameters
12. Biological richness image of Chikmagalur district
13. Field photographs of different landscapes of the study area
14. Field photographs of different vegetation types of the study area
15. Field photographs of endemic and RET plant species of Chikmagalur district
16. Field photographs of endemic and RET plant species of Chikmagalur district
17. Field photographs of important medicinal plants recorded in the study area
18. Satellite image depicting mining and land cover changes
19. Satellite images of pre and post fire periods
20. A typical query in biodiversity information system (BIS)
21. Herbarium specimen of *Tarenna agumbensis*
