ACKNOWLEDGEMENT

I offer my profound reverence to ‘Almighty God’ who enabled me to make this study a success by helping in all dawns and dusks during my studies as well as other walks of life too.

I am deeply and totally indebted to my Supervisor Dr. Ramanjit Kaur Johal, Reader, Department of Public Administration, Panjab University, Chandigarh for the invaluable constant guidance, timely support, encouragement, affection and maximum devotion towards the completion of my thesis at every stage. Her highly meticulous approach to research with comments of appreciation, critical and constructive criticism and valuable suggestions at every step of my work has not only shaped the present version but also broadened my perspective during the entire course of this investigation. She was both friend and guide during this period.

I would also like to record my gratitude to Professor B.S. Ghuman, Chairman, Department of Public Administration, Panjab University. His kind and valuable advice at all times was a great source of strength. I would also like to thank Dr. Satnam Singh, Ex-Hon. Advisor, Centre of Public Health, Panjab University, for his valuable guidance during the initial phase of this research.

I would like to thank Dr. (Mrs.) Jogindra Vati Gupta, Sr. Lecturer, National Institute of Nursing Education, PGIMER for providing me guidance and support from time to time during the study.

I express my sincere thanks to Directors/Head of Departments/Incharges in health department offices, Chandigarh who provided me co-operation in making the records available to support the study. My thanks are also due to the Library Incharge and Administrative Staff of the Department Public Administration, Panjab University for the help and co-operation extended from time to time. I extend my thanks to Mr. Sanjay, Statistician for the help he extended in the data processing and analysis.

My maximum gratitude is due to parents and parents-in-law whose blessings have brought me to this stage. My special thanks are due to my friend Mrs. Meenakshi Agnihotri for support during the course of my study.
Words fail me as I attempt to express my feeling of gratitude to my husband Sanjeev, who showed immense patience and understanding at the most difficult stages of this project and constantly encouraged and supported me. I am extremely grateful to my loving sons Vinay and Abhinay who missed their mama for these long years. I humbly offer my prayers to God to bless them with prosperous happy life.

Last, but not the least I express my heartiest thanks to all the subjects who participated in this work; without their cooperation the chapters of this study could not have unfolded and the findings would have remained unrevealed.

I dedicate this thesis to my husband Sanjeev and my dear sons Vinay and Abhinay.
