ACKNOWLEDGEMENTS

This work could not have been completed without the support of many people. I would first like to thank my supervisor, Dr. Praveen Sharda, for her support and encouragement. She showed genuine interest in my work and passionate enthusiasm to see it in its present shape. She helped me get the materials I needed and made my stay in India very pleasant.

I would like to thank Prof. M. P. Jain for his help at the initial stages of my research work. I would also like to thank Prof. Pushpinder Syal and Dr. Deepti Gupta for their suggestions and encouraging remarks. The teaching and non-teaching staff of Panjab University have all been very helpful and supportive.

To My family I owe a huge debt. My husband, Gibreel, has always been a tower of strength to me. His unflagging support and belief in me kept me going all the way through. He buoyed me up in moments of frustration and was always around whenever I needed help. His comments on earlier drafts and his painstaking proofreading made a difference to this work. My lovely kids, Malak and Noor, had to put up with my changing moods for about three years. I hope they forgive me and I promise to make it up to them.

I would also like to thank my subjects at Taiz University for bearing with me during the data collection stage. They showed interest in my work and wanted me to make a difference to the admission testing scenario at Taiz University. I hope this thesis meets their expectations.

Special words of thanks go to Dr. Sanad Mustafa, my internal supervisor during my data collection. He was enthusiastic about my work and spent long hours giving me suggestions and professional advice. I may not have acted upon all of his suggestions but they were valuable and opened up many research possibilities for me.

Last, but not least, I would like to thank my sponsor, Taiz University, for granting me leave and providing me with financial support. I would like to acknowledge this support and hope to be able to translate the findings of this work into practical ideas to the benefit of Taiz University in specific and Yemen at large.

Thikra Kaed Ali Ghalib
