1.1. Introduction.

1.2. General Overview.

1.2.1. Importance of Traditional medicine.
1.2.2. History of plant medicine.
1.2.3. Current status of Plant based medicine.
1.2.4. Current situation in Indian system of medicines.
1.2.5. Plants in conventional western medicine.
1.2.6. Serious underestimation of plant derived medicines.
1.2.7. Tendency towards unrefined or “natural” assuming non-toxic.
1.2.8. Ethno medical use of leads for discovery of modern drugs.
1.2.9. Expansion of human civilization poses a threat to plant biomass.
1.2.10. Bioactive properties derived from plants.
1.2.11. Incidence of Cancer.
1.2.12. Underlying Cause in many types of cancer.
1.2.13. Chemotherapy.
   1.2.14.3. Antimetabolites.
   1.2.14.4. Inhibitors of Chromatin Function.
   1.2.14.5. Drugs Affecting Endocrine Function.
1.2.15. Plant compounds role in the treatment of cancer.
1.2.16. Plant-Derived Anti-Cancer Agents in Clinical Use.
1.2.17. Plant-Derived Anticancer Agents in Clinical Development.
1.2.18. Plant-Derived Antitumor Agents in Preclinical Development.
1.2.19. Flavonoids.
1.2.20. Flavonoids as anticancer agents.
1.2.21. Terpenes and Steroids.
1.2.22. Free radicals and cancer.
1.2.23. Role of Oxygen Free Radicals in tumor promotion.
1.2.25. Radical Scavenging Antioxidants, Second Line Defense.
1.2.27. Genotoxicity of Antitumor Drugs.
1.2.28. Pharmacological Properties of Anticancer Drugs.
1.2.29. COX-2 in Cancer.
1.2.30. *Tragia involucrata* Linn.
II. Isolation and structure elucidation of Terpenoid and Flavonoid. 42-76

2.1. Introduction.
2.2. Materials and Methods.
   2.2.1. Chemicals and Instruments.
   2.2.2. Collection of Plant material.
   2.2.3. Preparation of Extracts.
   2.2.4. Phyto-chemical Screening of Different Extracts.
      2.2.4.1. Steroids.
      2.2.4.2. Triterpenes.
      2.2.4.3. Alkaloids.
      2.2.4.4. Saponins.
      2.2.4.5. Flavonoids.
      2.2.4.6. Tannins.
      2.2.4.7. Carbohydrates.
      2.2.4.8. Proteins.
   2.2.5. Isolation, purification and characterization of sterols and triterpene.
      2.2.5.1. Isolation of sterol and triterpene.
      2.2.5.2. Removal of fixed oil by saponification from the Hexane extract.
      2.2.5.3. Thin layer chromatography of sterols and triterpenes.
      2.2.5.4. Preparation of extract for column chromatography.
      2.2.5.5. Column chromatography.
      2.2.5.6. Crystallization of triterpene.
      2.2.5.7. Crystallization of Sterol.
   2.2.6. Isolation, purification and characterization of flavonoids.
      2.2.6.1. Isolation of Flavonoids.
      2.2.6.2. Thin layer chromatography of flavonoids.
      2.2.6.3. Preparative thin layer chromatography.
      2.2.6.4. Application of the substance.
      2.2.6.5. Detection of the spots.
      2.2.6.6. Collection of the Zones and Extraction.

2.3. Results.
   2.3.1. Preparation of different extracts and phytochemical analysis.
   2.3.2. TLC data for the hexane extract.
   2.3.3. Column Chromatography.
   2.3.4. Physical examination of sterol and triterpene.
   2.3.5. Chemical examination of sterol and triterpene.
   2.3.6. Spectroscopic analysis of triterpene.
   2.3.7. Characterization of flavonoids.
      2.3.7.1. TLC data for the Ethyl acetate extract.
      2.3.7.2. Physical examination of Flavonoids.
      2.3.7.3. Chemical test of the flavonoids.
      2.3.7.4. Spectroscopic analysis of Flavonoid.

2.4. Conclusion.
4.2.4. Bone marrow chromosome aberration assay.
4.2.5. Bone marrow micronucleus test.
4.2.6. Sperm shape abnormality assay.
4.2.7. Statistical analysis.

4.3. Results.
4.3.1. Chromosomal aberration assay.
4.3.2. Bone marrow MN assay.
4.3.3. Sperm shape abnormality assay.

4.4. Discussion.

4.5. Conclusion.

V. Pharmacological Studies. 121-142

5.1. Introduction.

5.2. Material and Methods.
5.2.1. Chemicals.
5.2.2. Experimental animals.
5.2.3. Anti-fertility activity.
5.2.4. Estrogenic and anti-estrogenic activity.
5.2.5. Anti-inflammatory activity.
5.2.6. Analgesic activity.
5.2.7. Statistical analysis.

5.3. Results.
5.3.1. Anti-implantation activity.
5.3.2. Estrogenic and anti-estrogenic activity.
5.3.3. Anti-inflammatory activity.
5.3.4. Analgesic activity.

5.4. Discussion

5.5. Conclusion

VI. References. 143-163
