intestine of rohu (*Labeo rohita*)

3.4.1 Partial purification of amylases and trypsins. 73
3.4.2 Characterization of amylases. 74
3.4.3 Characterization of trypsins. 76
3.4.4 Effect of substrate concentration on amylases and trypsins. 78
3.4.5 Zymograms and molecular weight determination of amylases and trypsins. 78

Effect of dietary antibiotic on the digestive enzymes activities in rohu *Labeo rohita*. 82

Effect of feeds on the digestive enzymes activities and growth in rohu *Labeo rohita*. 84
3.6.1 Studies on the effect of feeds during early growth stages. 84
3.6.2 Effect of carbohydrate sources on *L. rohita* fingerlings. 87
3.6.3 Effect of protein sources on *L. rohita* fingerlings. 90
3.7 *in vitro* hydrolysis of feed ingredients. 93
3.7.1 Hydrolysis of carbohydrate sources. 93
3.7.2 Hydrolysis of protein sources. 94

4. **Results** 97

Digestive enzyme activity in different size groups and segments along the digestive tract in rohu (*Labeo rohita*)

4.1 Relationship among biometric parameters and digestive enzymes and size 97
4.1.2 Digestive enzymes activities in the segments of the digestive tract. 102
4.1.3 Screening for carbohydrases in the intestine. 102
4.2 Ontogeny of digestive enzymes and growth in rohu (*Labeo rohita*)

4.3 Partial purification and characterization of amylases and trypsins from the intestine of rohu (*Labeo rohita*)

4.3.1 Partial purification of amylases and trypsins.

4.3.2 Characterization of amylases.

4.3.3 Characterization of trypsins.

4.3.4 Effect of substrate concentration on amylases and trypsins.

4.3.5 Zymograms and molecular weight determination of amylases and trypsins.

4.4 Effect of dietary antibiotic on the digestive enzymes activities in *L. rohita*.

4.5 Effect of feeds on the digestive enzymes activities and growth in *L. rohita*.

4.5.1 Studies on the effect of feeds during early growth stages.

4.5.2 Effect of carbohydrate sources on *L. rohita* fingerlings.

4.5.3 Effect of protein sources on *L. rohita* fingerlings.

4.6 *in vitro* hydrolysis of feed ingredients.

4.6.1 Hydrolysis of carbohydrate sources.

4.6.2 Hydrolysis of protein sources.

5 Discussion

5.1 Digestive enzyme activity in different size groups and segments along the digestive tract in rohu (*Labeo rohita*)

5.1.1 Relationship among biometric parameters and digestive enzymes and size

5.1.2 Digestive enzymes activities in the segments of the digestive tract.

5.1.3 Screening for carbohydrases in the intestine.
5.2 Ontogeny of digestive enzymes and growth in rohu (*Labeo rohita*)

Partial purification and characterization of amylases and trypsins from the intestine of rohu (*Labeo rohita*)

5.3.1 Purification of amylases and trypsins.

5.3.2 Characterization of amylases

5.3.3 Characterization of trypsins

Effect of dietary antibiotic on the digestive enzymes activities in rohu (*Labeo rohita*) at laval and fingerling stages.

Effect of feeds on the digestive enzymes activities and growth in rohu (*Labeo rohita*).

5.5.1 Studies on the effect of feeds during early growth stages.

5.5.2 Effect of carbohydrate sources on *L. rohita* fingerlings.

5.5.3 Effect of protein sources on *L. rohita* fingerlings.

5.6 *in vitro* hydrolysis of feed ingredients.

6 Summary
