I wish to express my deepest sense of gratitude to Dr. Valdapudi Kumar, Reader in Biochemistry, Kevempu University-P.G. Centre, for guiding me through the Ph.D. program. As Ph.D. supervisor his constant support, motivation and timely monitoring and evaluation of work carried out in each semester, helped in the smooth conduct of the program. I appreciate the freedom, which he gave me during the entire course of my work. His positive attitude and practical approach towards research and development have influenced my work to a great extent.

I would like to express my profound gratitude to Dr. Manu Jaggi, Director and Dr. Rama Mukherjee, Ex-President, Dabur Research Foundation (DRF) for their keen interest in promoting continuing education and giving their consent to carry out my Ph.D. research work while performing my official duties at DRF.

I am grateful to Prof. Basavaraj Madhusudhan, Chairman, B.O.S., Dr. Gopal M. Adviti Rao, Chairman of the Department for their cooperation at different modules during my Ph.D. program. I wish to warmly thank all the faculty members, Research Scholars and as well as the non-teaching staff of the DOS in Biochemistry, Kevempu University-P.G. Centre for their help both direct and indirect in the completion of the research work.

I would like to acknowledge the help of Dr. Anu T. Singh, Associate Director DRF for her valuable advice and friendly help from time to time. My sincere thanks to Dr. Mukand K. Gajjar and Dr. Radhika D. Wakharkar, Division of Organic Chemistry for the design, synthesis and submission of novel molecules for anti-cancer screening. I am thankful to Dr. Manoj Kumar Singh, Anshumali Awasthi, Priyanka Jain and Gautam Mishra, Analytical Development Lab, DRF, for providing the analytical support for the conduct of solubility and co-solvent formulation experiments for in vivo studies. I am thankful to my colleagues in In-vitro Biology, In-vivo Biology labs and Small animal facility for allowing me to use their facilities, freely, throughout the duration of the study. I am highly thankful to Mr. Dev Kumar for timely providing animals to conduct experiments.

Thanks especially to my colleagues and friends — Anika, Manupriya and Hari for helping me with the anti-cancer screening work, Dr. Praveen, for helping me in standardizing the angiogenesis assays, Dr. Gurvinder, Dr. Ritu, Aksh, Prathiba, Kartik for executing the apoptosis experiments. Pallavi, Pramila,
Tariq, Rupesh and Krishna for their support and good company and encouragement, which have been invaluable for me during the progress of my work.

I am also very thankful to Mrs. Rajlaxmi and Mr. Manik for library support and Dr. Radha and Mrs. Navneet for their support to complete the thesis.

It gives me immense pleasure to dedicate this thesis to my loving parents for all that they have done for me. Special thanks to my brother and his family, sister and her family, my wife's family, for all the moral support they gave me from time to time, and all my friends for their affection and encouragement.

Last but not the least, I wish to acknowledge the love and patience of my wife, Deepti, and loving daughter Vedika for their magnanimous support. They kept me motivated and going right from the tough years when I had to manage both office and Ph.D. work till the final shape up of this thesis. Without my wife's affection and constant support, this work would never have been accomplished.

My apologies if I've inadvertently omitted anyone to whom acknowledgement is due.

(Vinod Kumar S)
