A WORD OF GRATITUDE

It gives me immense pleasure to place on record my deep sense of gratitude to my guide Dr. D. Abdul Budan, Professor and Head of Department of Mechanical Engineering, UBDT College of Engineering, Davangere, Karnataka, for his invaluable guidance and constant encouragement during the course of my research work.

Words are inadequate to express my deep sense of gratitude to my co-guide Dr. B.K. Sridhara, Professor of Mechanical Engineering, The National Institute of Engineering, Mysore, Karnataka for his invaluable guidance and constant encouragement during the course of my research work. I am deeply indebted to him for useful discussions both academic and otherwise; I had with him during this research programme.

I also thank the Principal Dr. Suresh Chandra Mohan, UBDT College of Engineering, Davangere, for extending active support during this research work.

I sincerely express my heartfelt thanks to the Management of The National Institute of Engineering, Mysore, for giving permission to pursue research work and for providing financial assistance to attend the International Conference at Bahrain under TEQIP.

I thank Dr. M.S Shivakumar, Principal National Institute of Engineering, Mysore, for extending his active support during this research work. I also take this opportunity to thank Dr. G. Raghavendra Rao for extending his support during this research work.

I express my sincere thanks to Dr. S.C. Sharma, Principal, R.V. College of Engineering and Professor Krishna, in charge of Centre of Materials Research, Department of Mechanical Engineering, R.V. College of Engineering, Bangalore, for providing facilities to prepare composite material specimens. I also thank Mr. Kumara, operator of electrical resistance furnace in R.V. College of Engineering, Bangalore for extending his help in fabricating composite specimens.

I also thank the Dr. S. Arunachalam, Professor University of East London, United Kingdom and Dr. T. Page, Professor Loughborough University, United Kingdom, for extending active support during this research work. I wish to place on record my
gratitude to Mr. Krupashankar, Visiting Professor, Mechanical Engineering department, RV College of Engineering, for his useful suggestions during the course of this research.

I thank the Director of Central Food Technological Research Institute of India, Mysore, for giving permission to take Scanning Electron Micrographs of the tensile test specimens. My special thanks are to Professor Satish V Kailas, Professor, Department of Mechanical Engineering, Indian Institute of Science, and Bangalore for his timely help and guidance during this research work.

I thank Dr. T.N.Shridhar, Head, Department of Mechanical Engineering, The National Institute of Engineering, Mysore, with great pleasure for extending his invaluable support during this research work. I make a special mention of my colleague Mr. M.V.Achutha, and thank him for his constant companionship and encouragement extended during this programme. I also thank Dr. N.V.Raghavendra, my colleague for his constant encouragement and useful suggestions during this research work.

I thank my friend Dr. N. Dayananda Jawali for extending his help during the course of this research work. I also thank Dr. R. GopalKrishne Urs, Professor and Head, Physics Department, and Dr. C.I.V Shastry for their help during this research work.

My thanks are to Mr.Babu, Computer Science Department, The National Institute of Engineering, Mysore, for his help during the research work. I also thank Mr.Siddha Raju, National Institute of Engineering, Mysore for his assistance in carrying out machining of the composite specimens.

Finally and most importantly, my wife Shaila and my daughters Pooja and Priya deserve my deepest appreciation for their patience, love and support during the successful completion of this work.

Mysore
