ANNEXURE-2

Patient Information Sheet

You are being requested to take part in a study entitled “Role of repair genes polymorphism & DNA hyper-methylation of GSTP gene in the risk of prostate cancer”. No other biological sample will be taken from the subjects except 2ml venous blood. Investigation of these parameters, which may be beneficial to you in understanding the biological behavior the disease, will also have useful applications in future.

Sample Material Required:

I shall use blood sample (2 ml) to extract DNA and to genotype the polymorphism of the metabolic genes and hormonal genes.

Voluntary participation:

Your participation in the project is voluntary. You can withdraw from the project at any time, and this will not affect your subsequent medical treatment or relationship with the treating physician. Any additional expense for the study, other than your regular expense, will be borne by the project funds, and not charged to you.

Risks (if any) to the patient:

There are no additional risks and side effects expected by volunteering for the study, as one time donation of 2 ml of blood for the study should not add any risk to you. Additional finances for the research project will be borne by the project fund, and no part of expenses will be charged to you. If you have any queries, your
attending doctor will answer. I assure of total confidentiality of the data and your name will not be disclosed. You are free to withdraw from the study at any time of the study and your withdrawal will not interfere with the standard of your therapy.
