List of Tables

Table 2.1: Modified category of EFL writing strategies ............................................. 19
Table 2.2: Principles of writing assessment adopted from Hyland (2004) ............... 39
Table 2.3: Hyland’s summary of the benefits of genre approach to writing .......... 39
Table 2.4: Components of foreign language learning motivation (Dornyei, 1994, p.280) .................................................................................................................. 46
Table 3.1: Distribution of the total study population and the subjects across fields of studies ........................................................................................................ 52
Table 3.2: The reliability coefficients of writing items under each category .......... 59
Table 3.3: Results of factor analysis of the of subscales ..................................... 60-61
Table 3.4: Results of the measurement of inter-rater agreement using Kappa ...... 63-64
Table 4.1: Writing strategies employed by the subjects with their mean scores, standard deviations and rank order of usage ........................................ 69-72
Table 4.2: Most and least preferred strategies employed by ability levels .......... 72-73
Table 4.3: Descriptive statistics of the overall mean of writing strategy category use by subjects .................................................................................................... 74
Table 4.4: Descriptive statistics of writing proficiency levels of subjects ............ 76
Table 4.5: One way ANOVA: Proficiency test results by groups ....................... 76
Table 4.6: Post hoc Scheffe’s test for the three ability groups ......................... 77
Table 4.7: Correlations between categories of writing strategies and writing ability .. 78
Table 4.8: Individual writing strategies displaying variation by proficiency level ..... 79
Table 4.9: Summary of stepwise multiple regression analysis of predictors of writing achievement ................................................................. 80
Table 4.10: Overall mean of writing strategy use, mean of strategy categories and rank order by fields of study ................................................................. 81
Table 4.11: Results of ANOVA analysis in the use of five writing strategy
Table 4.24: Categories and frequencies of writing strategy use of respondents
with illustrations ................................................................. 105-106

Table 4.25: Positive and negative responses to revision and edition of texts .... 107

Table 4.26: Frequency of writing strategy use by proficiency level ............... 107-108

Table 4.27: Frequency of types of texts reported to be written by ability groups... 110

Table 4.28: Descriptive statistics of mean ranking of perceived difficulties in
writing .................................................................................... 111

Table 4.29: Descriptive statistics of mean rankings on perceived difficulties in
writing by level of writing ability ............................................. 112

Table 4.30: Descriptive statistics of mean rankings on aspects of good writing .... 113

Table 4.31: Descriptive statistics of mean rankings on aspects of good writing by
level of writing ability ............................................................... 115

Table 4.32: Criteria used by ability groups to determine quality of piece of writing 116

Table 4.33: Attitudes of Ethiopian undergraduate students towards writing ........ 118

Table 4.34: Responses to questions on letter and diary writing by level of writing
proficiency ............................................................................... 119

Table 4.35: Difficulties faced in writing and ways of overcoming .................. 120

Table 4.36: Writing strategies suggested as useful to developing writing skills,
with frequency counts and illustrative examples............................. 121-122

Table 4.37: Descriptive statistics of the importance of writing strategies rated by
subjects selected for the interview based on a five point scale (1 to 5) ... 123

Table 4.38: Descriptive statistics of motivational variables ....................... 126-127

Table 4.39: Relationship of motivational variables with writing strategy use ........ 128

Table 4.40: Correlation between motivational variables and writing strategy
category use ........................................................................ 129-130

Table 4.41: Multivariate test results for main effects and interaction effects on
writing strategy use .......................................................................................... 131-133
Table 4.42: Reasons for developing writing skills by first choice of subjects mean rating, standard deviation, and ranking ........................................................................ 134
Table 4.43: Mean of writing strategy use by reason for developing writing skills by first choice .................................................................................................. 136
Table 4.44: Level of enjoyment in writing a text .................................................. 138
Table 4.45: Attitudes of EFL undergraduate students towards writing .................. 138
Table 4.46: Relationship between Attitudinal variables and writing ability ............ 139
Table 4.47: Factors contributing for dissatisfaction and satisfaction with the exam results identified from open-ended questions ........................................ 140-142
Table 4.48: Factors contributing for dissatisfaction and satisfaction with the ways of teaching writing identified from open-ended questions .............. 143-146
Table 4.49: Relationship between attitudinal variables and the writing strategy use by mean ........................................................................................................ 147
