LIST OF FIGURES

CHAPTER 1

Fig.1.1: Hypothetical drug concentration profiles in the systemic circulation 03
Fig.1.2: Major feature of CR drug delivery system 05
Fig.1.3: Therapeutic occupancy time for once a daily dosage formulation 06
Fig.1.4: Skin: A cross section 15
Fig.1.5: Relationship between rate of drug release from a TDDS and rate of drug absorption through skin 18
Fig.1.6: Membrane-moderated TDDS 23
Fig.1.7: Adhesive-dispersion type TDDS 23
Fig.1.8: Cross-sectional view of matrix diffusion-controlled TDDS 25
Fig.1.9: Microreservoir dissolution-controlled TDDS 25
Fig.1.10: Classification of biodegradable polymers based on mechanism of degradation 30

CHAPTER 2

Fig.2.1: (a) Keshary-Chien diffusion apparatus 54
Fig.2.1: (b) Schematic diagram Keshary-Chien diffusion apparatus 54
Fig.2.2: Dissolution apparatus 57

CHAPTER 3

Fig.3.1: FTIR spectra of PVA, captopril and PVA with captopril 74
Fig.3.2: FTIR spectra of PVA crosslinked with Fa, Ac, Pp and GA 75
Fig.3.3: FTIR spectra of PVA containing captopril and crosslinked with Fa, Ac, Pp and GA 76
Fig.3.4: DSC curves of PVA, captopril and PVA with captopril 79
Fig.3.5: DSC curves of PVA crosslinked with Fa, Ac, Pp and GA 80
Fig.3.6: DSC curves of PVA containing captopril and crosslinked with Fa, Ac, Pp and GA 81
Fig.3.7: TGA curves of PVA, captopril, and PVA containing captopril and crosslinked with Fa, Ac, Pp and GA 83
Fig.3.8: TGA curves of PVA crosslinked with Fa, Ac, Pp and GA 84
Fig.3.9: In vitro release of captopril from different formulations 91
CHAPTER 4

Fig.4.1: FTIR spectra of PVA, chitosan and sodium alginate 113
Fig.4.2: FTIR spectra of GA crosslinked PVA, chitosan and sodium alginate 114
Fig.4.3: FTIR spectra of salbutamol sulphate loaded GA crosslinked transdermal membranes 115
Fig.4.4: DSC curves of PVA, chitosan, GA crosslinked PVA, and PVA-chitosan 119
Fig.4.5: DSC curves of sodium alginate and GA crosslinked PVA-sodium alginate 120
Fig.4.6: DSC curves of salbutamol sulphate loaded GA crosslinked PVA-chitosan 121
Fig.4.7: DSC curves of salbutamol sulphate loaded GA crosslinked PVA-sodium alginate 122
Fig.4.8: TGA curves of PVA, chitosan, sodium alginate and GA crosslinked PVA, chitosan and sodium alginate 124
Fig.4.9: TGA curves of salbutamol sulphate, GA crosslinked PVA-chitosan and PVA-sodium alginate 125
Fig.4.10. In vitro release profile of salbutamol sulphate 131

CHAPTER 5

Fig.5.1: IPN materials 139
Fig.5.2: FTIR spectra of sodium alginate, GG, CPM and CPM loaded GA crosslinked sodium alginate-GG IPN 149
Fig.5.3: DSC curves of sodium alginate, GG, CPM and CPM loaded GA crosslinked sodium alginate-GG IPN 151
Fig.5.4: TGA curves of sodium alginate, GG, CPM and CPM loaded GA crosslinked sodium alginate-GG IPN 152
Fig.5.5: In vitro release profile of CPM 157
CHAPTER 6

Fig.6.1: FTIR spectra of chitosan, ibuprofen, GA crosslinked chitosan, ibuprofen loaded crosslinked chitosan

Fig.6.2: DSC curves of chitosan, ibuprofen, GA crosslinked chitosan, ibuprofen loaded crosslinked chitosan

Fig.6.3: TGA curves of chitosan, ibuprofen, GA crosslinked chitosan, ibuprofen loaded crosslinked chitosan

Fig.6.4: SEM of ibuprofen loaded GA crosslinked chitosan microspheres

Fig.6.5: Effect of stirring rate on size of chitosan microspheres

Fig.6.6: Effect of GA concentration on size of chitosan microspheres

Fig.6.7: Effect of GA concentration on rate of swelling

Fig.6.8: Amount of drug released from chitosan microspheres

Fig.6.9: Amount of drug released from chitosan microspheres loaded with different concentrations of drug

CHAPTER 7

Fig.7.1: FTIR spectra of chitosan, sodium alginate, ofloxacin and ofloxacin loaded IPN

Fig.7.2: DSC curves of chitosan, sodium alginate, ofloxacin and ofloxacin loaded IPN

Fig.7.3: TGA curves of chitosan, sodium alginate, ofloxacin and ofloxacin loaded IPN

Fig.7.4: SEM view of IPN bead

Fig.7.5: Rate of water uptake by beads (exposed to GA for 15 min)

Fig.7.6: Rate of water uptake by beads (exposed to GA for 30 min)

Fig.7.7: Drying rate of beads (exposed to GA for 15 min)

Fig.7.8: Drying rate of beads (exposed to GA for 30 min)

Fig.7.9: Rate of drug release from IPN beads (exposed to GA for 15 min)

Fig.7.10. Rate of drug release from IPN beads (exposed to GA for 30 min)
