Acknowledgements

"A teacher is pious gift of God, whose precious guidance enables one to select the right path."

In the completion of this project I incurred heavy debts to patronage and guidance, which can only be acknowledged but cannot be paid back.

With profound and deep regards I express my gratitude and indebtedness to my worthy supervisor, Dr. S.K. Mehta, Reader, Department of Chemistry, Panjab University, Chandigarh for his valuable guidance, keen interest, constant encouragement and patience from conception to completion of these investigations. It would have been impossible for me to achieve this goal without his support and care.

My sincere thanks to my Co-supervisor, Prof. K.K, Bhasin, Department of Chemistry, Panjab University, Chandigarh, whose dynamic and able guidance has played a very crucial role in my Ph.D. research. His scholarly instinct and humble response to all my naive queries and inquisitiveness is admirable.

I am thankful to Prof. R.K, Dewan for his everlasting encouragement.

I am grateful to Prof. M.L. Sharma, Chairperson, Department of Chemistry, Panjab University, Chandigarh, for providing me the requisite laboratory facilities.

I am thankful to Dr. A.K, Sharma, Dr. Kavalsit, Dr. Shweta, Dr. Neelam, Shilpee, Garima, Khushi, Gupreet, Bhawana, Savita, Sanjay, Rishu, Ekta, Chandermani and Vishal for their kind cooperation in completing this work.

A special thanks to Dr. Aman Bhalla for his help and encouragement in pursuing the thesis. My acknowledge shall be incomplete without the mention of some important people who, as friends motivated me from time to time and lending me all their possible help. Thank you – Rajeev, Yogesh, Hem Raj, Jitender, Rajender, Dr. Sandeep, Dr. Surender, Vivek, Harish and Suresh.

The cooperative attitude of Mr. Joginder Singh (Librarian), technical and non-teaching staff of Department of Chemistry, Panjab University, Chandigarh is also gratefully acknowledged.
Words are inadequate to reflect the extent of my feelings for my family, whose bounteous support and sacrifice at various stages of my life has provided the stepping-stones for me to reach the milestone where I am today. I would be failing in my duty if I do not acknowledge the enduring support and encouragement received from my mother-in-law and father-in-law. Without their love and cooperation, it would have been impossible to accomplish this work.

It gives me immense pleasure to acknowledge my thanks to my beloved wife Sonia, who attended many of my personal problems at home and for her moral support.

I am thankful to UGC, New Delhi for the award of research fellowship. Finally, I thank God, the Almighty for granting me an opportunity and strength to successfully accomplish this piece of work.

Ganga Ram
