Acknowledgements

With the heartfelt thanks to almighty God, I extend my gratitude to my worthy supervisor Prof. K. K. Bhasin, whose curious research approach, innovative ideas, encouraging criticism and step by step advice has inspired me throughout my research period to realize the tasks and give those a shape of thesis. He has always been a driving force and a guiding light for me to look into the new insights of research with his logical and conceptual reasoning. His experimental skills and research expertise has always made me feel privileged to work and learn under his valued guidance.

I am extremely grateful to my Co-supervisor and Chairman, Department of Chemistry, Prof. S. K. Mehta whose direction and acquaintances during the research period made me complete my research objectives and his munificent support as a Chairman has created an active research environment in the department.

I am pleased to thank Mr. Joginder Singh (ex. Librarian), Department of Chemistry, for providing the knowledge of literature related to research. His well-timed and valuable information regarding books and journals has always made his presence a privilege and nobility for the research growth in the department.

I am thankful to Mr. Avtar Singh and Mr. Ashwani Kumar for providing the required NMR facility that was inevitable for my research to proceed further.

I show gratitude to Dr. Rajni Sharma and Mr. Kamlesh, IIT Kanpur for assisting their help in X-ray data collection.

I express thanks to my lab mates Dr. Rajeev, Yogesh, Dr. Shivani, Mrs. Gurjeet, Amanmeet and Harjeet whose presence created a healthy, cooperative and spirited working atmosphere in the laboratory. I am particularly thankful to Ekta for her research related suggestions as an encouraging lab mate and moral support as an affectionate friend.

It is not enough to express thanks to my friend Gurpreet who has constantly stood beside me with her persuasive attitude and convincing words that make me feel blessed to have a friend like her.

I am thankful to my friends Bhanwa, Savita, Khushwinder, Sanjay, Dr. Shweta, Neha, Ravneet, Sokshi, Sheffi, Priya, Khushboo and Kulwinder for their helping and cheering attitude that has rejuvenated me time and again during the research period.

I am thankful to my husband Dr. Vimal K. Bhardwaj for his poised, concerned and thoughtful mind-set that has inspired me to complete this task with an ease.

I am thankful to my family for their love, support and understanding behaviour, especially my parents whose condition less care and warmth can neither be evaluated nor compared with any precious thing in the world. Their fortunate presence has given meaning to my deeds and their wise words will always motivate me to do better in every field of life.

Rishu
