ACKNOWLEDGEMENTS

At last strenuous strives of my dear parents Smt. & Sh. Chhote Lal Aggarwal bore fruit, under the sacred patronage of the "Almighty", in the form of successful completion of my Ph.D. work. Infact it is with the added encouragement, guidance and kind help from all my nears and dears.

The generous help in the form of concrete constructive criticism, sane suggestions and admirable appreciations has always been received from my guide Dr. R.K.Dewan, Professor in physical chemistry.

Dr. S.K.Mehta, Lecturer in physical chemistry always extended his co-operative contributions and provided congenial atmosphere to let me complete my work with such an ease.

Dr. I.R.Trehan, the Chairman has been kind enough in providing the necessary laboratory facilities.

From fathoms deep of my heart, a strong sense of indebtedness and gratitude will always let me remember their never ending efforts and whole hearted co-operation towards me - otherwise, a novice and learner only.
