ACKNOWLEDGEMENTS

The research and writing of this doctoral thesis has been a thoroughly absorbing process. I mean this in the sense that, I have had the good fortune to spend three years totally immersed, day-to-day, in the questions examined by this thesis. I also mean this in the sense that, this thesis has absorbed fragments of ideas. So, in ensuring that credit is given where it is due, the acknowledgments and thanks enumerated here not only go to those who have aided me in under academic capacity, but also to those who have helped with their support, friendship and general discussions.

This thesis arose in part out of years of research that has been done since I came to Dr. K. M. Mahadevan & Prof. V. P. Vaidya’s research circle. It is a pleasure to convey my gratitude to them all in my humble acknowledgment.

In the first place I would like to record my gratitude to Dr. K.M. Mahadevan for his supervision, advice, and guidance from the very early stage of this research as well as giving me extraordinary insights throughout the work. Above all and the most needed, he provided me unflinching encouragement and support in various ways. I have been benefited by advice and guidance from Dr. K. M. Mahadevan who bestowed his timely assistance even for answering some of my unintelligent questions. His truly scientist intuition has made him as a constant oasis of ideas and passions in science, which exceptionally inspire and enrich my growth as a student, a researcher and a human being want to be. I am indebted to him more than he expects.

Many thanks go in particular to Prof. V. P. Vaidya, I am much indebted to him for his valuable advice in scientific discussion, supervision and furthermore, using his precious times to read this thesis and gave his critical comments about it. Thank you sir.

Many people have contributed to this thesis, in a variety of ways. I would like to thank the following former and present faculty members from the Department of Chemistry and Industrial Chemistry: Prof. B. S. Sherigara, Honorable Vice Chancellor, Kuvempu University, Prof. P. Vasudeva Nayak, Director, School of Chemical Sciences,
Dr. J. Keshavayya, Dr. T. V. Venkatesha, Dr. Y. Arthoba Naik, Dr. H. S. Bhojya Naik, Dr. K. V. Vasantha Kumar Pai, Dr. K. R. Venugopal Reddy, Dr. H. M. Vagdevi and Dr. Basavaraj Padmashali. They are all provided me with encouragement throughout my thesis, giving me perspective from the other side of the Ph.D. domain and letting me know I was in their thoughts as I passed the various milestones of the thesis path.

The biggest acknowledgments go to Mr. K. M. Vinay, Lecturer, Department of PG Studies & Research in English, who had the energy to work through my text, and to polish my English. Thank you very much for reviewing the research papers.

I would also like to thank the people who worked together with me in various fields and projects during the past years. Many of my friends should be mentioned here. Thanks especially to Mr. M. N. Kumaraswamy, Mr. D. B. Aruna Kumar, Mr. G. K. Nagaraja, Mr. G. K. Prakasha & Mr. C. Chandrashekar for all inspiring discussions, their advice and their willingness to share their bright thoughts with me, which were very fruitful for shaping up my ideas and research.

Writing of this doctoral thesis would not have been possible without the help and advice by Dr. B. P. Nandeshwarappa. It is hard to write appropriate acknowledgments that reflect the assistance and inspiration I was given throughout.

I am immensely grateful to my best friend Mr. Moinuddin Khan, M. H. who has adding richness to my life, who has supported and given me honest feedback all along the way, with tremendous love and humor.

I cannot list all the people who made my life in University campus worthwhile. Doubtless, without friends I would never have managed to get through this work. Thanks to all Research Scholars of Department of Chemistry and Industrial Chemistry.

It is a pleasure to express my gratitude wholeheartedly to Non-Teaching Staff of both the Department for their timely help that helped directly or indirectly to this thesis.

Where would I be without my family? My parents deserve special mention for their inseparable support and prayers. My Father, Sri. B. Manjappa, and My Mother, Smt. B. M. Radha, who put the fundament my learning character, showing me the joy
of intellectual pursuit ever since I was a child. Although they may not have shared in my
fondness for science, but supported me in everything I have done. I am eternally grateful.

Words fail me to express my appreciation to my sister Asha, B. M. M.A. B. Ed., whose
dedication, love, moral support and persistent confidence in me, has taken the load off my
shoulder. I owe her for being unselfishly let her intelligence, passions, and ambitions
collide with mine. Thank you.

Finally, I place on record my thanks to S.G.S Computers, M.P Computers and
Ganga Book Binders, Shankaraghatta, for their neat typesetting in preparing this thesis.

Kiran B. M.
