Acknowledgement

My first and most solemn acknowledgment must go to Prof. Kanchan Jain and Prof. Suresh Sharma, my thesis supervisors, for their suggestions and constant support during this research. Both of them were always available for me and very easy to approach. In every sense, none of this work would have been possible without them.

I also pay my heartfelt gratitude to Prof. Shalabh of IIT Kanpur for his valuable suggestions. I am also grateful to Prof. Vikas Bisht of Dept. of Mathematics, Panjab Univ. for the fruitful discussions I had with him. I would also like to acknowledge my friends doing research in different universities and institutions for our wonderful discussions regarding various aspects of statistics in real life and most importantly for their help in arranging the much needed research articles.

At this time, I would like to remember my fellow researchers in Panacea Biotec Sampan R&D Centre for helping me to shape my thinking towards research. I must also acknowledge my M.Sc. classmates and teachers. Due to them, I developed an emotional bonding with this department which provided much needed encouragement during not so good times. I give special thanks to Vishal Mourya, Anju Goyal and other fellow researchers of the department for exchanging ideas to improve my work.

I also acknowledge the Chairperson, Faculty members and Staff of the Department of Statistics, Panjab Univ. for providing a good research environment and support throughout my PhD.

Finally, I pay my earnest gratitude to my parents for their patience and love. Without them this work never has come into existence.
