Contents

Contents of Table ....... (VII - X)
Contents of Figures ...... (XI - XIII)
Abbreviation ...... (XIV)

1- Introduction .... (1 - 3)

2- Review of literature ..... (4 - 80)
  2.1 Cancer Worldwide - The global picture of cancer ...... (5)
    2.1.1 The Scale of Cancer problem ...... (5)
    2.1.2 Commonly diagnosed cancers worldwide ...... (7)
    2.1.3 Mortality from cancer worldwide ...... (7)
    2.1.4 Worldwide Incidence of uro-epithelial Cancer ...... (8)
    2.1.5 Extrapolation of incidence rate for bladder cancer to countries and regions .... (10)
      2.1.5.1 Geographic variation in bladder cancer incidence ...... (10)
    2.1.5.2 India ...... (12)
    2.1.6 Bladder cancer histology ...... (13)
  2.2 Signs, Symptoms, Diagnosis and treatment ...... (15)
    2.2.1 Symptoms in the General population ...... (15)
    2.2.2 Diagnosis ...... (16)
    2.2.3 Grading System of Urinary Cancer ...... (16)
    2.2.4 Staging Systems of Urinary Cancer ...... (17)
    2.2.5 Metastatic Disease ...... (20)
    2.2.6 Prognosis ...... (21)
  2.3 Descriptive Epidemiology / Etiology of uro-epithelial cancer ...... (22)
    2.3.1 International Geographic Variation ...... (23)
    2.3.2 Age, Gender, Racial identity ...... (23)
    2.3.3 Time's trends ...... (23)
  2.4 Analytical Epidemiology / Etiology (environmental risk factors) ...... (24)
    2.4.1 Tobacco Smoking ...... (24)
    2.4.2 Industry-related carcinogens ...... (26)
      2.4.2.1 Aromatic Amines ...... (26)
      2.4.2.2 Polycyclic Aromatic Hydrocarbons (PAH) ...... (26)
      2.4.2.3 Other Industry-related agents ...... (26)
      2.4.2.4 Latent Period of Occupational exposure ...... (27)
      2.4.2.5 High risks occupations and exposure to risky factors ...... (27)
    2.4.3 Food and Drinks (Dietary factors) ...... (29)
      2.4.3.1 Caffeine ...... (29)
      2.4.3.2 Artificial sweeteners ...... (30)
      2.4.3.3 Alcohol drinking ...... (30)
      2.4.3.4 Drinking water and fluid intake ...... (31)
      2.4.3.5 Meat and heterocyclic amines ...... (31)
      2.4.3.6 Vegetables and fruits ...... (32)
    2.4.4 Chloroform and other Chlorination By-products ...... (32)
    2.4.5 Inorganic Arsenic and Arsenite salts ...... (33)
    2.4.6 Iatrogenic Factors (Drugs) ...... (34)
      2.4.6.1 Analgesics ...... (34)
      2.4.6.2 Cyclophosphamide and chloronaphazine ...... (34)
    2.4.7 Radiation ...... (35)
    2.4.8 Hair Dyes ...... (35)
    2.4.9 Urological conditions ...... (36)
      2.4.9.1 Urinary tract infection ...... (36)
      2.4.9.2 Urinary stasis ...... (36)
      2.4.9.3 Urine pH ...... (36)
    2.4.10 Bracken Fern ...... (37)
2.4.11 Schistosomiasis......(38)
2.4.12 Familial occurrence and hereditary Factors......(38)

2.5 Molecular pathology; Models of Uro-epithelial cancer development......(39)

2.6 DNA repair genes and cancer...... (42)
2.6.1 The role of apurinic/apyrimidinic (AP) endonuclease I (APE I) and DNA Ligase-I (LIG-I) genes in BER repair pathway...... (43)
2.6.2 The role of Nijmegen Breakage Syndrome-1 gene (NBS-I) in DSB repair pathway...... (46)

2.7 FAS gene as in FAS signaling in receptor-mediated apoptosis......(49)

2.8 Cytokine gene polymorphisms, Cancer Susceptibility and Prognosis...... (50)
2.8.1 Interleukin-1 (IL-1) .......(54)
2.8.4 Interleukin 1 Receptor antagonist (IL-1Ra) .......(55)
2.8.5 Interleukin 18 (IL-18).... (58)
2.8.7 Interferon-γ (IFN-γ) .......(60)
2.8.8 Interleukin 13 (IL-13) .......(61)

2.9 DNA Hypermethylation...... (62)
2.9.1 Hypermethylation in cancer...... (66)
2.9.2 Hypermethylation of genes in uro-epithelial cancer...... (68)
2.9.4 Caspase-8 (with critical role in apoptosis pathway) studied for hypermethylation (71)
2.9.5 Retinoblastoma (Rb) (with critical role in cell cycle) studied for hypermethylation (72)
2.9.6 Methods to detect DNA methylation events in clinical specimens...... (74)

2.10 Polymorphism and genetic analysis in solid tumours......(76)

2.11 Micro-satellites and Minisatellites ......(78)

3- Aims and Objective ......(81)

4- Material and Methods .....(82 - 121)
4.1 Sample Collection (specimens) .....(82)
4.2 Epidemiology .....(82)
4.3 Chemicals ......(82)
4.4 DNA extraction ......(84)
4.4.1 Solutions and Reagents used for DNA isolation ......(84)
4.4.2 DNA extraction from frozen blood by phenol-chloroform method ......(84)
4.4.3 DNA extraction from frozen tissue by phenol-chloroform method ......(85)
4.5 Extraction of DNA from paraffin embedded tissue ......(86)
4.6 Determination of DNA Quality and concentration by spectrophotometer .......(87)
4.7 Methods to study SNPs ......(88)
4.7.1 PCR-RFLP ......(88)
4.7.2 VNTR-PCR ......(92)
4.7.3 CTTP-PCR ......(92)
4.7.4 ARMS-PCR ......(95)
4.7.5 SSP-PCR ......(95)
4.8 Agarose gel electrophoresis ......(97)
4.8.1 Reagents and solutions used for gel electrophoresis ......(97)
4.8.2 Procedure of gel electrophoresis ......(97)
4.9 Microsatellite analysis ......(97)
4.9.1 Reagents and Solutions used for PAGE ......(99)
4.9.2 Preparation of polyacrylamide gels ......(99)
4.9.3 Silver staining of polyacrylamide gels ......(100)
4.9.4 Reagents and Solutions ......(100)
4.9.5 Procedure of staining ......(100)
4.10 Bisulphite Reaction ......(101)

4.11 MSP-PCR ......(102)
4.12 RNA isolation ......(102)
4.12.1 Isolation of peripheral blood mononuclear cells ......(104)
4.12.2 Making RNase free ......(104)
4.12.3 Regents and solutions used for RNA isolation (104)
4.12.4 Isolation RNA from Tissue (105)
4.12.5 Isolation RNA from fresh Blood (106)
4.12.5.1 RBC Lysis buffer (400 ml) (106)
4.12.5.2 Procedure (106)
4.13 DNA isolation from blood or tissue samples after application of TRIzol reagent for RNA isolation (107)
4.14 Determination of quantity and quality of RNA (108)
4.14.1 Reagent and Solutions (108)
4.14.2 Procedure (108)
4.15 cDNA Synthesis (109)
4.16 PCR of cDNA (113)
4.17 Human Interleukin ELISA (113)
4.17.1 Reagents and provided material in Kts. (114)
4.17.2 Additional materials required (114)
4.17.3 Reagent preparation (115)
4.17.4 Assay procedure (116)
4.17.5 Calculation of results (117)
4.18 Sequencing (118)
4.19 Statistical analysis (120)

5- Results (122 - 231)
5.1 Baseline characteristics (122)
5.2 Baseline characteristics in study of expression profiles of IL-13, IFN-γ and IL-18 in uro-epithelial cancer (128)
5.3 Baseline characteristics in study of methylation pattern of CASP-8 and Rb1 in uro-epithelial cancer (129)
5.4 The genotype distribution, allele frequency of SNP-study genes among cases and controls and their association with uro-epithelial cancer (131)
5.4.1 Ligl (exon 6 A→C) (131)
5.4.2 NBS (Glu185Gln) (132)
5.4.3 APE-I (Asp148Glu)(2197 T→G) (132)
5.4.4 FAS (TNFRSF6)(-670, G→A) (133)
5.4.5 IL-1β (-137, G→C) (134)
5.4.6 IL-1β (-31, C→T) (135)
5.4.7 IFN-γ (+874, T→A) (136)
5.4.8 IL-4 (intron-3 VNTR, minisatellite) (137)
5.4.9 IL-1Ra (intron 2 VNTR, minisatellite) (138)
5.5 Interaction between genotypes and gender in uro-epithelial cancer (140)
5.6 Interaction between genotypes and age in uro-epithelial cancer (142)
5.7 Interaction between genotypes and tobacco smoking in uro-epithelial cancer (smoking status, smoker status, pack-years) (145)
5.8 Interaction between genotypes and tobacco chewing in uro-epithelial cancer (147)
5.9 Interaction between genotypes and drinking status in uro-epithelial cancer (151)
5.10 Interaction between genotypes and occupational and residential place with risky factors in uro-epithelial cancer (157)
5.11 Interaction between genotypes and consumed water in uro-epithelial cancer (159)
5.12 Interaction between genotypes and the average exposure-period to sun-light in uro-epithelial cancer (164)
5.13 Interaction between genotypes and food-regime in uro-epithelial cancer (166)
5.14 Interaction between genotypes and usage of artificial hair-dye for risk of uro-epithelial cancer (169)
5.15 Interaction between genotypes and family history of bladder cancer in uro-epithelial cancer......(172)
5.16 Interaction between genotypes and histopathological grade of tumor in uro-epithelial cancer......(172)
5.17 Interaction between genotypes and stage of tumor in uro-epithelial cancer......(175)
5.18 Interaction between genetic polymorphism of study genes (Gene-Gene interaction) on uro-epithelial cancer......(177)
  5.18.1 LIG-I and APE genotype..............(177)
  5.18.2 LIG-I and NBS genotype.............(177)
  5.18.3 LIG-I and FAS genotype............(178)
  5.18.4 LIG-I and IL-1β genotype..........(178)
  5.18.5 LIG-I and IL-18 genotype.........(179)
  5.18.6 LIG-I and IFN-γ genotype........(179)
  5.18.7 LIG-I and IL-4 genotype..........(179)
  5.18.8 LIG-I and IL-1Ra genotype.......(180)
  5.18.9 NBS and APE genotype.............(180)
  5.18.10 NBS and FAS genotype..........(181)
  5.18.11 NBS and IL-1β genotype........(181)
  5.18.12 NBS and IL-18 genotype.........(182)
  5.18.13 NBS and IFN-γ genotype.........(182)
  5.18.14 NBS and IL-4 genotype.........(183)
  5.18.15 NBS and IL-1Ra genotype.......(183)
  5.18.16 APE and FAS genotype..........(184)
  5.18.17 APE and IL-1β genotype........(185)
  5.18.18 APE and IL-18 genotype........(185)
  5.18.19 APE and IFN-γ genotype.........(185)
  5.18.20 APE and IL-4 genotype.........(186)
  5.18.21 APE and IL-1Ra genotype.......(186)
  5.18.22 FAS and IL-4 genotype..........(187)
  5.18.23 FAS and IL-18 genotype.........(188)
  5.18.24 FAS and IFN-γ genotype.........(188)
  5.18.25 FAS and IL-1Ra genotype.......(189)
  5.18.26 FAS and IL-1Ra genotype.......(189)
  5.18.27 IL-4 and IL-1β genotype........(190)
  5.18.28 IL-4 and IL-18 genotype.......(190)
  5.18.29 IL-4 and IFN-γ genotype.......(191)
  5.18.30 IL-4 and IL-1Ra genotype......(192)
  5.18.31 IL-18 and IFN-γ genotype......(192)
  5.18.32 IL-18 and IL-1β genotype......(192)
  5.18.33 IL-18 and IL-1Ra genotype.....(193)
  5.18.34 IFN-γ and IL-1β genotype.....(194)
  5.18.35 IFN-γ and IL-1Ra genotype....(195)
  5.18.36 IL-1β and IL-1Ra genotype....(195)

5.19 Expression profile of IFN-γ in uro-epithelial cancer .... (196)
5.20 Correlation of IFN-γ single nucleotide polymorphism (+874T→A) with its expression pattern in uro-epithelial cancer ......(201)
5.21 Analysis of microsatellite polymorphism in the 1st intron of the IFN-γ......(203)
5.22 Impact of polymorphism of CA repeats microsatellite in the first intron of IFN-γ on its expression in uro-epithelial cancer ......(204)
5.23 Expression profile of IL-18 in uro-epithelial cancer.....(209)
5.24 Impact of IL-18 single nucleotide polymorphism (-137,G→C) on its expression in uro-epithelial cancer ......(214)
5.25 Expression profile of IL-13 in uro-epithelial cancer....(216)
5.26 Sequencing the SQRT-PCR production of IL-13 .....(221)
5.27 Study the methylation status of CASP-8 and Rb1 in uro-epithelial cancer ...(222)
5.28 Effect of promoter methylation of RB1 and CASP-8 on their expression....(229)
6- Discussion ..... (232 - 273)
  6.1 Epidemiology .....(232)
  6.2 Single nucleotide polymorphism with uro-epithelial cancer.......(237)
    6.2.1 SNP of repair genes and bladder cancer ...........(237)
    6.2.2 Relationship between SNP of FAS and uro-epithelial cancer ......(241)
    6.2.3 Relationship between SNP of cytokine and uro-epithelial cancer ........(243)
  6.3 Combination of genotypes of studied genes and the risk of uro-epithelial cancer ......(249)
  6.4 Study of expression profiles of interleukins IL-13, IL-18 and IFN-γ in uro-epithelial cancer .....(252)
    6.4.1 Expression of IL-13 in uro-epithelial cancer .......(253)
    6.4.2 Expression of IL-18 in uro-epithelial cancer .......(258)
    6.4.3 Expression profile and study of microsatellite in first intron of IFN-γ in uro-epithelial cancer ......(263)
  6.5 Methylation pattern of CASP-8 and Rb1 in uro-epithelial cancer and its effect on their expression ......(269)

7- Summary and conclusion ......(274 - 277)

8- Bibliography ......(277 - 315)

Appendix
