</table>

(a)
2.15 Inter-correlations of Coping Scales averaged over five occasions.
2.16 16 PF Dependability coefficients: Test–Retest after six days.
2.17 16 PF trait, stability coefficients, test–retest after two months.
2.18 16 PF homogeneities of individual scales.
2.19 16 PF equivalence coefficients of A and B forms.
2.20 16 PF validity coefficients of individual scales.
2.21 Correlations between motives and strategies.
2.22 Motive and Strategy in approaches to learning and studying (modified).
2.23 Unidimensionality and reliability check for the four subscales.
3.1 Sample Structure for the Study.
3.2 The sample size of the treatment group in 2x3 Factorial Design Classified on Total Scores.
3.3 School wise distribution of students to different groups.
3.4 School wise data schedule for test administration for the pre–testing of the students.
3.5 The date wise schedule for the conduct of experiment.
4.1(i) A Summary of descriptive statistics of Pre-test Scores for Skill of Acquiring knowledge of three groups (SFG, MFG and CLG).
4.1(ii) A Summary of analysis of variance on scores of Pre-Test (Criterion test) for the three groups (SFG, MFG and CLG).
4.1(iii) A Summary of descriptive statistics of Post-test Scores for Skill of Acquiring knowledge of three groups.
4.1(iv) Criterion post-test scores of three groups for skill of acquiring knowledge.
4.1(v) A Summary of One–Way ANOVA of scores of Post-Test (Criterion Test) for three groups.
4.1(vi) A Summary of descriptive statistics of Gain Scores for skill of acquiring knowledge of three groups (SFG, MFG and CLG).

4.1(vii) Criterion Gain scores of the three treatment groups for skill of acquiring knowledge.

4.1(viii) Criterion Gain Scores of the three treatment groups for skill of acquiring knowledge.

4.1(ix) A summary of two-way analysis of variance in respect of Achievement Gain Scores.

4.1(x) t-ratios for different combination pairs of instructional strategies for achievement gain scores.

4.2(i) A summary of descriptive statistics of Pre—Test scores for Skill of Critical Thinking of three groups (SFG, MFG and CLG).

4.2(ii) A Summary of analysis of variance on scores of Pre—Test for Skill of Critical Thinking of the three groups (SFG, MFG and CLG).

4.2(iii) A summary of descriptive statistics of Post—Test scores for Skill of Critical Thinking of three groups (SFG, MFG and CLG).

4.2(iv) Criterion Gain Scores of the three treatment groups for critical thinking.

4.2(v) A summary of one—way ANOVA of scores on Post—Test for Skill of Critical Thinking for three groups.

4.2(vi) A summary of descriptive statistics of Gain Scores for Skill of Critical Thinking of three groups (SFG, MFG and CLG).

4.2(vii) Gain Scores for Skill of Critical Thinking of the three treatment groups.

4.2(viii) Gain Scores (Critical Thinking) of the three treatment groups.

4.2(ix) A summary of two—way analysis of variance in respect of gain scores of critical thinking.

4.2(x) t—ratios for different combination pairs of instructional strategies for critical thinking gain scores.
4.3(i) A summary of descriptive statistics of Pre-Test Scores for skill of Decision Making of three groups (SFG, MFG and CLG).

4.3(ii) A summary of analysis of variance on scores of Pre-Test (Decision Making) for the three groups.

4.3(iii) A summary of descriptive statistics of Post-Test (Decision Making) of three groups.

4.3(iv) Criterion gain scores of the three treatment groups for skill of decision making.

4.3(v) A summary of one-way ANOVA of scores on Post-Test (Decision Making) for the three groups.

4.3(vi) A summary of descriptive statistics of Gain Scores for skill of Decision Making of three groups.

4.3(vii) Gain Scores (Decision Making) of the three treatment groups.

4.3(viii) Gain Scores (Decision Making) of the three treatment groups.

4.3(ix) A summary of two-way analysis of variance in respect of gain scores of decision making.

4.3(x) t-ratios for different combination pairs of instructional strategies for decision making gain scores.

4.4(i) A summary of descriptive statistics of Pre-test Scores for Confrontive Coping strategy of Coping stress of three groups.

4.4(ii) A Summary of Analysis of Variance on Scores of Pre-test Scores (Confrontive Coping) for three groups.

4.4(iii) A summary of descriptive statistics of post-test scores for the three groups (Confrontive Coping).

4.4(iv) A summary of one-way ANOVA of scores on post-test scores for the three groups (Confrontive Coping).

4.4(v) A summary of descriptive statistics of gain scores for confrontive coping of the three groups.

4.4(vii) t–ratios for different combination pairs of instructional strategies for coping stress (confrontive coping) gain scores.

4.4(viii) t–ratios for the difference in means of coping stress (confrontive coping) gain scores of the three instructional strategies at the two approaches to learning (Interactional effects).

4.4(ix) A Summary of descriptive statistics of Pre–test scores (Distancing) coping stress of three groups.

4.4(x) A summary of analysis of variance on scores of Pre–test (Distancing) for the three groups.

4.4(xi) A summary of descriptive statistics of post-test scores for the three groups (Distancing).

4.4(xii) A summary of one-way ANOVA of scores on post-test scores for the three groups (Distancing).

4.4(xiii) A summary of descriptive statistics of gain scores for distancing of three groups.

4.4(xv) t–ratios for different combination pairs of instructional strategies for coping stress (distancing) gain scores.

4.4(xvi) t–ratios for different combination pairs of approaches to learning for coping stress (distancing) gain scores.

4.4(xvii) A Summary of descriptive statistics of Pre–test scores (Self–Controlling) of three groups.

4.4(xviii) A Summary of analysis of variances on Pre–test scores (Self–Controlling) of three groups.

4.4(xix) A summary of descriptive statistics of post-test scores for the three groups (Self–Controlling).

4.4(xx) A summary of one-way ANOVA of scores on post-test scores for the three groups (Self–Controlling).

4.4(xxi) A summary of descriptive statistics of gain scores for self controlling of the three groups.

(e)
4.4(xxiii) A summary of descriptive statistics of pre-test scores (seeking social support) for the three groups.

4.4(xxiv) A summary of analysis of variance on scores of pre-test scores (seeking social support) for the three groups.

4.4(xxv) A summary of descriptive statistics of post-test scores for the three groups (Seeking Social Support).

4.4(xxvi) A summary of one-way ANOVA of scores on post-test scores for the three groups (Seeking Social Support).

4.4(xxvii) A summary of descriptive statistics of gain scores for seeking social support of the three groups.

4.4(xxviii) A summary of two-way analysis of variance in respect of gain scores of seeking social support scale of coping stress.

4.4(xxix) A summary of descriptive statistics of pre-test scores (Accepting Responsibility) of three groups.

4.4(xxx) A summary of analysis of variance on scores of pre-test scores (Accepting responsibility) for the three groups.

4.4(xxi) A summary of descriptive statistics of post-test scores for the three groups (Accepting Responsibility).

4.4(xxii) A summary of one-way ANOVA of scores on post-test scores for the three groups (Accepting Responsibility).

4.4(xxiii) A summary of descriptive statistics of gain scores for accepting responsibility of the three groups.

4.4(xxv) t-ratios for different combination pairs of instructional strategies for coping stress (accepting responsibility) gain scores.

4.4(xxvi) t-ratios for different combination of approaches to learning for coping stress (accepting responsibility) gain scores.

4.4(xxvii) t-ratios for the difference in means of coping stress (accepting responsibility) gain scores of the three instructional strategies at the two approaches to learning (Interaction effects).
4.4(xxxviii) A summary of descriptive statistics of pre-test scores (Escape-Avoidance) of three groups.

4.4(xxxix) A summary of analysis of variance on scores of pre-test scores for the three groups (Escape—Avoidance).

4.4(xl) A summary of descriptive statistics of post-test scores for the three groups (Escape-Avoidance).

4.4(xli) A summary of one-way ANOVA on scores of post-test scores for the three groups (Escape-Avoidance).

4.4(xlii) A summary of descriptive statistics of gain scores for escape avoidance of the three groups.

4.4(xliii) A summary of two-way analysis of variance in respect of gain scores of escape avoidance scale of coping stress.

4.4(xliv) A summary of descriptive statistics of pre-test scores (Planful problem solving) of three groups.

4.4(xlv) A summary of analysis of variance on scores of pre-test scores for the three groups (Planful Problem Solving).

4.4(xlvi) A summary of descriptive statistics of post-test scores for the three groups (Planful Problem Solving).

4.4(xlvii) A summary of one-way ANOVA of scores on post-test scores for the three groups (Planful Problem Solving).

4.4(xlviii) A summary of descriptive statistics of gain scores for planful problem solving of the three groups.

4.4(l) t—ratios for different combination pairs of instructional strategies for coping stress (planful problem solving) gain scores.

4.4(li) A summary of descriptive statistics of pre-test scores (Positive Reappraisal scale) of three groups.

4.4(lii) A summary of analysis of variance on scores of pre-test scores for the three groups (Positive reappraisal).

4.4(liii) A summary of descriptive statistics of post-test scores for the three groups (Positive Reappraisal).

(g)
4.4(iv)  A summary of one-way ANOVA of scores on post-test scores for the three groups (Positive Reappraisal).

4.4(iv)  A summary of descriptive statistics of gain scores for positive reappraisal of the three groups.

4.4(iv)  A summary of two-way analysis of variance in respect of gain scores of positive reappraisal scale of coping stress.

4.4(iv)  t-ratios for different combination pairs of instructional strategies for coping stress (positive reappraisal) gain scores.

4.4(iv)  t-ratios for different combination of approaches to learning for coping stress (positive reappraisal) gain scores.

4.4(iv)  t-ratios for the difference in means of coping stress (positive reappraisal) gain scores of the three instructional strategies at the two approaches to learning (Interaction affects).

4.4(iv)  A summary of two-way analysis of variance in respect of total gain scores of coping stress.
