ACKNOWLEDGEMENTS

It is my pleasant privilege to record my gratitude to my revered teacher and mentor, Prof. P.N. Mehra, D.Sc., F.N.I., FNASc., FBS, former Research Advisor, Himachal Pradesh University, Shimla, formerly Head/Director, SAP, Department of Botany, Panjab University, Chandigarh, with whom I had the opportunity to work and develop concepts and career in a variety of tree tissue culture systems. I am grateful to him for his kind suggestions of taking up challenging problem for my doctoral thesis and inspirational guidance to pursuing the daunting task with a keen sense of observation and commitment.

It has been my good fortune to have been equally associated with my revered teacher and co-guide, Prof. H.S. Sohi, FNA, FAAS, formerly Chairman, Department of Botany, Panjab University, Chandigarh and ex-director, National Centre for Mushroom Research and Training, Solan. I am grateful to him for his kind inspiration and help in compilation of this thesis without which it may not have attained the present form it has now. It would be an invaluable experience of an everlasting value.

I thank all the faculty members of the Department of Botany and different chairmen for providing me with all the necessary laboratory facilities as and when required. I am particularly thankful to Prof. G.S. Rawla, Chairman, Department of Botany, Panjab University, Chandigarh, who has very kindly provided me with all the official and moral support to accomplish this task.

Indeed, it has been a matter of pleasure to receive all possible help and facilities from my seniors and colleagues at Regional Fruit Research Station, Mashobra, Shimla and in the department as and when required.

I owe immensely to my parents, by virtue of their inspiration support, training and love that I could pursue this task with total commitment. I owe a great deal to Dhanju family for all their support and particularly grateful to my wife and loving son, who have shown extreme patience, understanding and extended full co-operation, bearing with me at many critical times.

Thanks are also due to PANTECH Computers, Ludhiana for immaculate word processing of this manuscript.

Last but not the least, the financial assistance in the form of DST project research fellowship during the project period June 1979 to March 1984 is gratefully acknowledged.
