ACKNOWLEDGEMENTS

It gives me great pleasure to express my deep sense of gratitude to Dr. Joginder Singh, Project Coordinator (Maize), All India Maize Improvement Project, Indian Agricultural Research Institute, New Delhi, for kindly suggesting me the problem, helpful guidance, constructive criticisms and constant encouragement from time to time for the successful completion of this investigation. I am also highly indebted to him for critically going through the entire manuscript.

I am very much thankful to Dr. H. D. Singh, Assistant Maize Breeder, Division of Genetics, I.A.R.I., whose sincere efforts in various aspects made this investigation successful. I am also thankful to Dr. Bhag Singh for his valuable help during the early part of this research work.

I am very much thankful to Mr. Surendra Narain Mathur, Institute of Agricultural Research Statistics, for preparing the computer programme and to Mr. T.C.M. Menon, Wheat Research Coordination Centre, I.A.R.I., for making necessary modification in it and other valuable suggestions for statistical analysis. My heartfelt thanks are due to Mr. Kanwarjit Singh Powa, Wheat Research Coordination Centre, for rendering his sincere help during statistical analysis and compilation of data.
Thanks are due to Drs. M.S. Swaminathan and H.K. Jain, former Director, I.A.R.I. and Head, Division of Genetics, I.A.R.I. respectively for kindly permitting me to carry out research work with all facilities in the Division of Genetics, while being registered for Ph.D. degree with Panjab University, Chandigarh.

Last, but not the least I am thankful to my wife Mrs. Yashoda Visht for her constant cooperation and inspiration during the period of this investigation.

New Delhi, (S.S. Visht)
