ACKNOWLEDGEMENTS

With deep sense of gratitude, I express my profound indebtedness to my guides: Dr. Sunil Dutt, Assistant Professor, Department of Education and Educational Management, National Institute of Technical Teachers’ Training and Research, Sector 26, Chandigarh and Dr. Sanjeev Kumar, Lecturer, Government College of Education, Sector 20, Chandigarh for their invaluable guidance, stimulating suggestions and constant encouragement throughout the course of this study. Words seem insufficient to appreciate their professional acumen, supportive attitude, and above all their empathetic approach which made it possible for me to accomplish this task smoothly. This work owes a great deal to the time and attention they have given to it.

I wish to express my sincere thanks to Dr. Raj K. Gupta, Chairperson, Department of Education, Panjab University, Chandigarh for providing the required facilities and academic support for completion of this research work.

I am pleased to extend my sincere thanks to Dr. Harsh Batra, Principal, Government College of Education, Sector 20, Chandigarh for her continuous cooperation and inspiration.

I am also grateful to the Principals, Teachers and Students of various schools of Chandigarh who cheerfully helped me in carrying out the experimentation work; without their cooperation, this study would not have been possible.

I extend my appreciation to the Biology teachers and experts who have contributed their innovative and generous ideas to develop materials for this study.

I would also like to thank Mr. S. K. Bhandari and other Administrative Staff Members of Department of Education, Panjab University, Chandigarh for their administrative support during the course of this work.
I would like to thank my friends and colleagues who have encouraged me to achieve my goals. I am particularly appreciative of Dr. Anurag Sankhian for his continuous support and motivation for timely completion of this work. I also extend my thanks to Mrs. Anjali Puri, who readily offered her much needed support for the submission of this thesis.

I express my sincere appreciation to my husband Mr. Ashok Aggarwal for his unstinted support during this work.

I dedicate my work to my two lovely children who, besides being a great emotional support, gave me several ideas during this study to be pondered upon from a student perspective. Ishani, my daughter, not only proofread and edited the script but also helped me in handling of statistical data. My son, Shitanshu, gave the technical support to accomplish this work through his unswerving computer expertise.

Last, but not least, I would like to express my indebtedness to my parents who have always remained a constant source of unconditional love, inspiration and encouragement for me.
