ACKNOWLEDGEMENTS

I owe my deepest indebtedness to my teacher and guide, Professor D.V. Vadehra, who initiated me into this work and gave me moral and academic sustenance during the years of my study. The tremendous assistance given by him in improving the quality of this manuscript needs a special mention.

The co-operation extended by Dr. P.J. Asnani, Chairman, Department of Microbiology and the assistance in radiation work provided by Dr. P.C. Mangal, Reader, Department of Biophysics is gratefully acknowledged.

I acknowledge my gratitude to my friends and parents for bearing with me and helping me in the moments of dejection known to every researcher.

I would also like to acknowledge the financial assistance from the University Grants Commission in the form of a research fellowship.

I wish to thank Mr. Trilochan Singh for the expedient typing of the final draft.
