ACKNOWLEDGMENTS

The present research work on "Feasibility Studies on using alternative fuels for diesel engine to mitigate environmental pollution" becomes worthless if I didn't acknowledge the help rendered by my well wishers.

At first, I remember my parents at this occasion with whom's blessings I could complete this thesis work, ESPECIALLY my beloved Father who's is nomore today. His words of solace and encouragement especially during difficult times ever remembered. To them, I am forever, indebted.

Next to god, Guru plays important role in shaping the future of any student. I take this opportunity to express my sincere gratitude to my Guide Dr. N.T Manjunath, Chairman Civil Department, University B.D.T. College of Engineering, Davangere, for his panegyrical efforts, ever helping attitude critical and valuable comments and constant inspiration with a keen interest in the progress of present research. The accelerated way of his approach in correcting the proof copy, advising in the flow of text and finalising the corrected copy, has made me to complete the writing of this thesis within this short period of time. I am highly indebted to him throughout my life.

Another Guru to whom I should indebted is my Co-guide Dr. GP. Prabhukummar, Principal, Acharya Institute of Technology, Bangalore. He was my past teacher, ex Principal of U.B.D.T. Engineering College, Davangere, in which I am serving as a staff. His constant support, encouragement and valuable guidance made me to complete this thesis work at right time.

Thanks are due to Dr. Abdul Budan, Academic Dean and Ex Chairman of the Mechanical Engineering Department, Dr. C.S. Venkatesh, Chairman Mechanical Engineering Department for their valuable suggestions and providing facilities to carry out the experimentation work in the Mechanical Laboratory.
Thanks are also due Dr. Siddeshwarappa, Chairman, Industrial Production Department, who permitted to use the exhaust gas analyzer to carry out my research work.

With deep sense of gratitude the author acknowledges the whole hearted cooperation extended by Dr. Suresh Chandra Mohan, Principal, U.B.D.T. College of Engineering, Davangere for his constant encouragement.

Thanks are also due to authorities of Kuvempu University for providing me an oppurtunity to carryout the research work

I would like to thank all the staff of the Mechanical Laboratory. Special word of thanks to Mr. Manjunath and Mr. Umapaty for providing technical support during the experimentation work.

Due to the preoccupation with the priorities for the research project my wife Mrs Rekha R. Kangoker, who is deprived of the privileges and prerogatives which god has bestowed on her. Her patience, kind understanding and constant encouragement and existence have always been a moral booster for me.

Thanks are also due to my elder brother Dr. K.M. Shamsundar, sisters, and all my family in-laws, relatives and my friends for their love, affection and emotional support and guidance. Special thanks to my son Chi. Vinay R. Kangoker, my brother’s son Chi. Ninad S. Kangoker and daughter Kumari Impana S. Kangoker who enlightened my emotions during my research work.

Lastly I would like to apologize to all those names, which do not figure here, but have helped me during the tenure of my research work.

Davangere
