ACKNOWLEDGEMENTS

I deem it my pleasant privilege to place on record my sincerest thanks and a deep sense of gratitude to:

Dr. Nitya Nand, F.N.A., Director, Central Drug Research Institute (C.D.R.I.), Lucknow for the constant encouragement and his keen interest in the present study and for providing the research facilities;

Dr. G.P. Dutta, D.Sc., under the inspiring and stimulating guidance of whom the present work has been accomplished;

Prof. S.N. Chakravarty, Prof. K.N. Wahl, and Dr. A. Chandra of the King George's Medical College (K.G.M.C.), Lucknow, for the kind permission to obtain clinical material from the medical wards of the G.M. and Associated Hospitals, Lucknow;

Dr. Arvind Singh, also of the K.G.M.C., Lucknow, for his active co-operation in the clinical investigations;

Dr. Shyam S. Agarwal, Reader in Medicine, K.G.M.C., Lucknow, for many a useful suggestion and valuable discussion;

all of my friends and colleagues whose unflinching co-operation has helped me to accomplish the present study; and, above all, the patients and the volunteers who withstood various procedures of the present investigations.

My thanks are also due to the Council of Scientific and Industrial Research, New Delhi and the Director, C.D.R.I., Lucknow for the award of Junior Research Fellowship.

FAWAN SHARMA
Division of Microbiology, Central Drug Research Institute, Lucknow.
