ACKNOWLEDGEMENT

A great mission is always achieved with first of all “God” grace and then with full dedication, support, encouragement and an effort par excellence. My prime thanks are due to magnificent, benevolent and compassionate creator who bestowed me with the courage and determination to complete this virtually difficult job. I am greatly indebted to my supervisor, Prof. K. K. Bamzai, whose comments, valuable scientific discussions and critical ideas are highlights of various aspects of this research. Without his sound guidance, supervision, motivation, advice, kindness and continual support, this research would have not reached its present form. Working under him has been a rich and healthy experience that I will remember throughout my life. Moreover, his personal qualities, inter-personal skills and good humor created an excellent working environment at CGMR lab.

I am equally grateful to Prof. Vivek Gupta, Head of the Department of Physics and Electronics, for providing me all the research facilities and for providing all possible help whenever required. I also express sincere thanks to all teaching and non – teaching staff of this department.

I sincerely acknowledge Institute Instrumentation Centre, Indian Institute of Technology (IIT) Roorkee, for providing the facilities of XRD and SEM – EDAX. I would also like to acknowledge the help provided by Department of Chemistry, University of Jammu, for providing the facility of FTIR and Department of Physics, University of Delhi, for providing the facility of hysteresis curve setup and piezoelectric system.

I owe my deepest regards to Prof. P. N. Kotru, Prof. S.K. Khosa, Prof. Rajnikant, Prof. Anju Bhasin and Prof. Naresh Padha for being so kind towards the students. I am also thankful to all the teaching and Non-teaching staff of the Department of Physics and Electronics, who have rendered their help during this experimental work.

It would be unforgivable if I don’t acknowledge the esteemed encouragement and help given to me by my senior colleagues of CGMR lab Dr. Vishal Singh Pathania, Dr. Shivani Suri, Mrs. Seema Verma, Mr. Ajay Singh Dadwal, Dr. Sanjay Verma, Dr.
Rakesh Koul, Mrs. Vandana Gupta and Mr. Shammi Kumar for their helpful attitude, support, suggestions and guidance.

My special thanks to Dr. Deepa Singh for fruitful discussions and guidance during my research work and compilation of thesis. It was an extremely enjoyable experience for working with my junior Rashmi Gupta.

I like to appreciate my juniors Goldy Salathia, Bindu Raina, Madhu Verma and Harjinder Singh for the co-operation, love and affection received during the research work.

I express my cordial thanks to my friends Dr. J. K. Sharma and Mr. M. S. Saini, my colleagues at Degree College, Jammu City, Paloura for fruitful discussion. I would also like to thanks Dr. Ramesh Sachdeva for their assistance at each and every step of my work.

Perhaps, the most difficult moment in the life of a person are those when he wishes to express his heartfelt feelings in the shape of words. I am extremely beholden with deepest sense of gratitude towards my loving Father Lt. Sh. Dewan Singh and my Mother Lt. Smt. Godawari Devi who showed me the right path of life and taught me the good things that really matter in life.

I extend my sincere thanks to Dr. Karan Singh for his inspiration during some periods of my life. It was my dream to have “Dr.” before my name as “Dr. Karan Singh” (former MP) had.

My thanks to my wife Peshal, my loving daughters Mahima, Krishka and son Vishav Pratap whose refreshing and angelic smile made me feel delighted even in the hours of tension and work load. I want to apologize for not giving proper time to them.

I am also indebted to my sisters, sisters-in-law and brothers-in-law being encouraging, inspiring and supporting all through my research work. A special vote of thanks to my loving brother Kuldeep Singh for being so nice and cooperative during completion of my thesis.

I expect to be forgiven if I have missed the name of anybody inadvertently who helped me to accomplish this work.

Thanks to All

Karan Singh
